

TISCHER
FREIZEITFAHRZEUGE

PICK-UP CABINS AND SEMI-TRAILERS

MOBILE FLEXIBILITY WITH COMFORT AND SERVICE // 2017 E

TRAIL version ...optimised aerodynamics thanks to the modern, rounded cabin concept. This is executed using two double-shell, foam-filled GRP moulded parts.

BOX version ...appears optically larger thanks to the angular design. Production is simpler and therefore more economical. The construction of the sandwich panels is identical to the TRAIL version and of the same high quality.

TISCHER AND PICK-UP

THE MOST FLEXIBLE WAY TO ENJOY A MOBILE HOLIDAY

The pick-up is an iconic American invention.

Since the 1920s, this vehicle type has been deployed in the USA for nearly all purposes.

The idea of using the pick-up as the basis for a motor home was also born in the USA. It was perfected and quality-enhanced, on the other hand, by us Europeans.

The desire for unrestricted mobility when travelling is particularly marked among campers. However, a combination of car and caravan is difficult to manoeuvre in the city or in mountainous regions, and many motor homes reach the end of the road here because of their size. Not too big for city traffic, not too small for comfortable travel –

a pick-up with comfortable demountable cabin is the ideal basis for flexible mobility.

The major advantages of TISCHER demountable cabins: Not only are they particularly simple to demount and mount, the pick-up's bed is fully usable again once the cabin has been removed. Have a look at the following pages and convince yourself of the numerous benefits of TISCHER demountable cabins. You will be surprised at the possibilities offered to you by a demountable cabin from TISCHER!

MOUNTING AND DEMOUNTING

THE PICK-UP CABIN

MOUNTING AND DEMOUNTING MADE EASY

Mounting and demounting the cabin is easy with the aid of the retractable supports. Thanks to the professional familiarisation session conducted by our specialist staff when the vehicle is being handed over, and with just a little practice, mounting and demounting can be done in 20 minutes.

Supports are extended using an electric screwdriver or a crank, or electrically

Turnbuckle and 13-pin socket

Mounting and demounting in just 20 minutes

DEMOUNTING

For demounting, you just have to release the attachments between cabin and pick-up and drop the four supports to the ground. The supports are extended with the help of a crank, an electric screwdriver or electrically until the cabin is separated from the vehicle. Once you have driven the vehicle away, you lower the cabin slightly to facilitate easy entry.

MOUNTING

Mounting the cabin is similarly easy, just in the reverse order: Lift the cabin until you can drive the pick-up beneath it. Now lower the cabin again, attach the brackets, plug in the 12-Volt plug and retract the supports.

SMART CONSTRUCTION

Every TISCHER cabin is designed to ensure that the truck bed need not be altered; it can be used without restriction following demounting.

PRODUCTION

CABIN CONSTRUCTION

MODERN ENGINEERING AND TRADITIONAL HANDCRAFTING

From the initial design to the finished TISCHER cabin, we take your wishes and requirements into account.

That is why, with the most modern machine engineering and the highest standards of precise workmanship, our staff produce premium-quality demountable cabins "Made in Germany".

The cabin is constructed to a sandwich design. The aluminium sheeting, solid foam and internal plywood panel are glued under pressure. Thereafter, the CNC-machined cabin components are precisely assembled. This construction technique offers a number of advantages: a high level of stability, low weight and outstanding insulating properties.

A detailed view of a motorhome's interior. The space is compact yet functional, featuring light wood-grain cabinetry and a white ceiling with a large skylight. On the left, a blue upholstered sofa with yellow patterned cushions is positioned next to a white table. The table is set with two glasses of orange juice, a bowl of fruit, and a small plate. To the right, a kitchen counter with a black glass cooktop is visible, with a bottle of olive oil and a bottle of beer on it. Below the counter, a black control panel with a power button is integrated into the wood paneling. In the background, a large bed with blue and yellow bedding is visible, and a window with yellow curtains looks out onto a landscape. The overall atmosphere is bright and modern.

INTERIOR WORLDS

INTERIOR AND EQUIPMENT ***SPACIOUS AND COMFORTABLE***

Living, sleeping, cooking, relaxing – and all in our demountable cabin. Ideal built-in units, comfortable seating elements and abundant storage space permit relaxed travelling. Generous bed dimensions and the optional lengthwise bed version ensure a good night's sleep.

INTERIOR WORLDS

KITCHEN AND BATHROOM **FUNCTIONAL AND PRACTICAL**

Even in the smallest of spaces we integrate a fully-functional kitchenette with large refrigerator, two-flame gas cooker and enough storage space for kitchen utensils. Thanks to a special fold-away wash basin, the bathroom offers enough space for WC, shower and wall cabinet.

INTERIOR WORLDS

FURNITURE MANUFACTURE

HIGH QUALITY AND APPEALING

Tradition and innovation go hand in hand:

We produce precisely tailored furniture, emphasising both functionality and wellbeing in the interior. Everything you need has a place of its own, close at hand. At the same time, we strive to provide open spaces, appealing surfaces and comfortable seating.

And special wishes present no problems either: Additional storage space, individual interior fittings or even greater comfort – we execute even the most unusual of ideas to meet your specifications exactly.

A high-angle photograph of a motorhome interior. A grey L-shaped sofa is the central feature, adorned with several pillows in white, yellow, and dark blue. In front of the sofa is a white rectangular table with a silver leg, holding a bowl of fruit, two glasses of orange juice, and a small book. To the right, a kitchen area with a white countertop and a stainless steel sink is visible. Large windows on both sides offer a view of a wooded landscape. The interior is finished with light wood paneling and yellow curtains.

INTERIOR WORLDS

SELECTION OF FABRICS

MODERN AND CLASSICALLY ATTRACTIVE

With modern fabrics, fashionable trend colours and lots of extras for the individual interior design of your demountable cabin, we ensure that you feel at home. Our upholstery and curtain fabrics are available in a choice of five different versions.

FABRIC DESIGN "CARINO"

YOU MAKE THE CHOICE!

WE MAKE YOUR WISHES COME TRUE

For even more individuality and personality, we offer our curtains in classic sewing styles with gathering tape as conventional curtains and drapes or in modern form as flat blinds and Roman blinds.

With our fabric designs Carino, Alsoma, Delio, Lindo and Savaro, we cater to all tastes. Whether eye-catching colours or an understated ambience:

Choose to suit your own personal taste!

TRAIL/BOX 200

Compact, light and spacious – with these features, the demountable cabin Trail/Box 200 is the ideal travel companion for couples taking active holidays.

The Trail/Box 200 model is suitable for both one-and-a-half cabin and double-cabin pick-ups. In combination with a one-and-a half cabin, the demountable cabin is almost flush with the back of the basis vehicle. This means the slope angle of the pick-up is not restricted and

the special construction technique of our most popular and lightest cabin means that good cross-country mobility is assured.

In the interior, numerous comfort features immediately become evident: a standing height of 1.95 m, a central seating group which can be converted to a bed area and the generous bed dimensions prevent any feeling of constriction; modern upholstery fabrics and curtains provide a pleasant environment even on long trips.

TRAIL/BOX 220

Within a very short space of time, the VW Amarok has become one of the most popular pick-up models. With the Trail/Box 220 model, the TISCHER range has the matching demountable cabin.

The vehicle has now undergone both an optical and above all a technical facelift. Greater power thanks to the V6 engine now also permits off-road tours. Our Model TRAIL/BOX 220 is tailored exactly to the Amarok to give a cohesive appearance.

The cabin unit is 382 cm long and barely wider than the basis vehicle. The resulting unit is compact and thus perfect for use on dirt roads and serpentine.

The bright and cosily-designed interior has a dinette with seating for two to three.

The equipment also includes a wardrobe, galley kitchen and a sanitation room with cassette WC, wash basin, shower and cabinet with mirror.

TRAIL/BOX 230/230S

The Trail/Box 230 and 230S models are particularly suited to all Japanese pick-ups with double-cabin driver's cab.

Here you can choose between rear entrance (230) and side entrance (230S). In terms of the extensive equipment, on the other hand, there are no differences. Both versions make a convincing impression with abundant space and comfort, the standing height is a pleasant 1.95 m. The kitchen, four cosy seats, a large bed in the alcove

and generous storage make even long trips a pleasure. With just minimal adjustment, the seating group can be converted into a further bed.

Also on board is a washroom with large, fold-down wash basin and a warm water system.

The washroom features a bench WC thus ensuring a clear layout with no sharp edges.

A further plus: easy cleaning is guaranteed.

TRAIL/BOX 240

Spacious, comfortable, variable – our Trail/Box 240 model makes a convincing impression with these and further features.

With the new Ford Ranger as the basis vehicle, you will drive comfortably and absolutely safely. As the first pick-up in the double-cabin version, the Ford Ranger was awarded five stars in the Euro-NCAP crashtest. And five stars also go to our pick-up-cabin: The Trail/Box 240 has a very special feature.

It is suitable for both one-and-half and double cabins. With this model featuring rear entrance, lack of space is a thing of the past. Generous dimensions and a standing height of 1.95 m, as well as numerous storage compartments turn even long journeys into a pleasure trip. The modern design of the interior and perfectly-matching handcrafted furniture demonstrate our vast experience in the construction of motor homes.

UNRESTRICTED TRAVEL....

TRAIL/BOX 250/275S

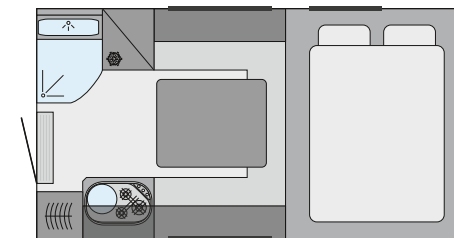

Family holidays with a pick-up? Why not? Our demountable TRAIL/BOX 250 cabin with rear entrance and 275S with side entrance are mobile holiday apartments for a family of four.

The roomy motor home cabin is particularly suited to American pick-ups with truck beds of around 1.99 m (6 ft) length. Thanks to the capacity of the basis vehicle and the large driver's cab, holidays with the family or as a group are easily possible, without making any compromises in

holiday enjoyment and accommodation comfort. The interior space is correspondingly generous.

The standing height is a pleasant two metres.

Built-in units in the highest workmanship, numerous storage compartments, modern, hardwearing upholstery fabrics and covers, as well as state of the art engineering, are only some of the many standard fitting details. The washroom designed for cabins with very little rear protrusion is compact yet completely equipped.

TRAIL/BOX 260/260S

No wish remains unfilled: Our 260 model with rear entrance or 260S with side entrance offer the optimum in spacious comfort for up to four occupants.

The living area offers enough space for relaxing, down-time, sleeping and for joint activities. Galley, four comfortable seating spaces, large beds, 1,95 m standing height, generous storage space and a washroom with large, fold-down wash basin provide an abundance of comfort.

The bench WC stretches right across from right to left and ensures a clear layout.

Modern engineering, generous filling capacities including a 45 litre underfloor waste water tank and lots of further details round off the extensive equipment.

The TRAIL/BOX 260/260S also displays a further special feature: It fits onto both pick-ups with one-and-a-half cabin driver's cab and the VW Amarok XL with double cabin and extended truck bed.

TRAIL/BOX 260R/260RS

The model corresponds essentially to the Trail/Box 260/260S model but is designed especially for the Land Rover Defender 130.

The most obvious difference is the standing height of 2.14 m, resulting from the adaptation to the higher driver's cab in the Defender. This makes the already spacious interior appear even airier. In addition, the cabin also offers additional storage space. Like all our cabins, the washroom also features the new, modern wall decor.

The darker shade provides an attractive contrast to the white bathroom fittings.

Typical for TISCHER, workmanship and quality are of the highest level: The modern sandwich construction technique and a stove-enamelled aluminium outer membrane make the cabin robust – even suitable for holiday trips off-road and far from civilization.

The 200 and 240 models are also available for the Land Rover Defender with a surcharge.

TRAIL/BOX 260SD

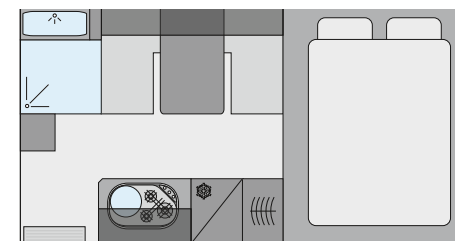

The demountable cabin Trail/Box 260SD is the ideal holiday home for a relaxed and extended trip for two.

Abundant space including a seating dinette at the side, generous storage space in the living area and a comfortable, wider washroom with large shower guarantee relaxed travel and every comfort. A space-saving sliding door leads into the washroom. The extensive standard equipment also includes two camping chairs and a table,

close at hand in a practical external storage space at the back.

With the 100 litre fresh water tank, two 5 kg gas cylinders and the 50 litre waste water tank, even extended holidays without a stop at a campsite pose no problems.

You are completely self-sufficient on your travels and at the same time enjoy all the comforts of a completely-equipped camper. Your personal holiday home on wheels awaits you!

TRAIL/BOX 280/280S

The Trail/Box 280 cabin model (with back entrance) and the 280S and 285S models (both with side entrance) were specially designed for VW flatbed trucks.

The series is further developed and the cabins are now available for T4 and T5 and the new T6. With a standing height of 2.03 m, all three versions are characterised by lots of space and comfort for four occupants. With a functionally-equipped kitchen and complete bathroom, nothing is left to

be desired, even on longer trips. A further special feature of the model: on request, we provide access to the driver's cab; in doing so we also alter the backrest of the back seat. For short trips or shopping without the cabin, the opening can be closed quickly and simply using a door and plastic panel.

The series flatbed from Volkswagen come up trumps with a special feature: During mounting, the tailboard just has to be detached for the cabin to fit like a glove.

Couldn't be less complicated.

Access to the driver's cab optional

LEISURE TIME & MORE

TAKING YOUR HOBBY ALONG
(IN-) SEPARABLE TRAVEL COMPANION

Holidays and relaxation often also involve action and fun. These include the very individual leisure time activities enthusiasts don't want to forgo on their travels. Be they racing cyclists, water sports fans or bikers: Hobby equipment can always be taken along.

SIMPLY FLEXIBLE

– FLEXIBLY SIMPLE

The compact dimensions of our pick-up and demountable cabins simplify travelling with a trailer and provide you with unimaginable flexibility on holiday.

Meter-long combinations that turn winding roads into a test of courage, and multiple attempts to fit into a parking space become things of the past with TISCHER demountable cabins. Horse box, boats or motorbike trailers can be towed with different basis vehicles in combination with various cabin and tow bar types. Alterations to the drawbar (stabilizing wheel) may be necessary.

A trailer bracket extension (Harbeck system) is possible with a restricted tow load of max. 1,700 kg.

E-BIKE, MOUNTAIN BIKE, RACING BIKE ...

Transporting bikes is really easy with our demountable cabins: with a bike rack directly at the rear, the bike simply comes along too. Depending on the entrance, the bike rack is attached to our pick-up models as either a fixed or a fold-away version.

So on your travels you can get close to nature on two wheels and enjoy your hobby to your heart's content.

Travel in comfort and yet remain completely flexible: No matter what hobby you want to take along, we will find the right individual solution for you and your four-wheel vehicle!

Have a word with us. We would be pleased to advise you on possible combinations and trailer loads.

COMPANY

TISCHER GMBH FREIZEITFAHRZEUGE **A PASSION FOR CAMPING- MADE IN GERMANY**

In our family, we have only ever considered one type of holiday: Camping. Back in the 70s, my father Josef and I came up with the idea of designing a motor home cabin that would fit on a VW pick-up. The popular VW was much more manoeuvrable than a car towing a caravan.

Our idea was a complete success and led to the establishment of TISCHER GmbH. Today, our family company based in Kreuzwertheim designs and manufactures demountable cabins for all pick-ups available on the German market. With a current staff of over 30, we produce around 180 cabins a year.

Cabin for cabin, with premium materials, precise workmanship and a passion for detail, we produce top quality "Made in Germany".

Die Alternative

TISCHER CHRONICLE THE HISTORY OF OUR SUCCESS

- 1973** First self-constructed cabin on a VW pick-up
- 1978** Move into the new plant in Wiebelbach
- 1980** Brands such as Ford, Mercedes, Mitsubishi and Toyota expand the range of basis vehicles
- 1982** Establishment of Tischer GmbH Freizeitfahrzeuge
- 1986** The Nissan pick-up becomes the primary basis vehicle
- 1990** Peter Tischer takes over the management of the company
- 1990** The TRAIL model series is launched
- 2001** The product range is expanded with the addition of the BOX model series
- 2013** Jubilee! We celebrate 40 years of TISCHER Freizeitfahrzeuge
- 2013** The erection and conversion of the company headquarters in Kreuzwertheim is completed
- 2014** The 4,000th TISCHER cabin leaves the plant
- 2015** By now, 178 TISCHER cabins are produced annually
- 2016** Award for TISCHER! The model 260S was distinguished as "The Perfect Camper 2016" by Reisemobilist magazine.
- 2017** A further award for TISCHER:
Our models TRAIL and BOX receive the "Seal of cabin quality 2017 for sturdy superstructure construction".

TISCHER TRADITION

FAMILY COMPANY **OVER 40 YEARS OF TRADITION AND EXPERIENCE**

We have been in the Wiebelbach industrial park since 1978. The company location at the centre of the Main-Franconia region is also our home. Which is why we have had our roots firmly in Kreuzwertheim for almost 40 years. With the plant conversion in 2013, we optimised cabin construction from the design phase to final assembly. Gain an impression of our range in our

showroom and avail of the individual consultation! And of course you pick up your cabin directly from us.

The familiarisation session then takes place directly in your own vehicle. If you happen to be passing through, use one of our camper spaces for a stopover. We look forward to your visit!

FRIENDS MEET FRIENDS

THE ANNUAL TISCHER TREFF

Once a year we invite our customers to a get-together.

We meet up every year in a different place; the main emphasis is on fun and a chance to swap experiences. Time and again, the enormous resonance confirms the longstanding bond between us as the manufacturers of demountable cabins and our customers.

Thanks to our long years of experience extending over four decades, we as a family company continue to ensure flexible travel, individual mobility and independent freedom.

Whether active holidays, relaxing as a couple, a family trip or luxury camping: Our customers enjoy the wide range of possibilities with the ingenious yet simple pick-up idea.

TISCHER SERVICE

SERVICE & GUARANTEE

ALL-ROUND CARE AND SUPPORT

Thank to our all-round customer care, you get not only our custom-made demountable cabins, but also a comprehensive range of services.

When we hand over your new TISCHER cabin, you also receive a comprehensive book containing our operating instructions and all the

operating instructions for the technical appliances and equipment installed. This allows you to do your own troubleshooting.

And should something require replacement, we procure and dispatch individual and replacement parts, as a rule within one working day. We have many of them in stock on site.

SERVICE & ACCESSORIES

EXTRAS IN BRAND QUALITY

The tonneau of your pick-ups deserves that extra something. We provide the cover and the coating.

TONNEAU COVER BAKFLIP

The optically appealing cover, made of aluminium, with integrated water drain, is extremely sturdy, can be used either completely or partially open when driving and adapts totally to the interior contours of the truck bed. As soon as the panels are closed, the BAKFLIP locks automatically. The cover is attached to the brackets with just two screws – this can be done without difficulty even where edge guards are in place.

The cover has a bearing load of up to 150 kg. The hinges are made of EPDM (ethylene-propylene-diene-monomer), a synthetic rubber which is corrosion-resistant, climate resistant and insensitive to acids. Thanks to the weatherproof material, the tonneau cover resists moisture, heat and frost. In addition, with the locked Bakflip and closed back flap, everything is safely stored to prevent theft.

RHINO LININGS® FOR FLATBEDS

For every TISCHER cabin we recommend the spray-on two-component plastic coating "Rhino Linings" for flatbeds and truck beds. In addition to outstanding non-slip properties and sound insulation, "Rhino Linings" coatings offer a permanently attractive appearance. The water and air permeable material is an outstanding alternative to conventional, loose truck bed lining and has been in use in the USA for lining truck beds since 1988.

TISCHER INDIVIDUAL

TRAIL 340S fixed structure on VW T5 chassis

BOX 260S on Nissan Navara, platform flatbed with fold-down, detachable tailboards

TRAIL-Liner mobile home as low-bed trailer (fifth wheeler)

DREAM COMBINATION

WASHROOM (EXCEPT TRAIL/BOX 200)

Large, fold-away wash basin, cassette WC and shower

Mirror, lighting and wall cabinet

Roof cover for ventilation

12 V / 230 V SYSTEM

Energy-saving 12 Volt LED lighting in living area

12 and 230 Volt socket

CEE input socket with 10 A automatic fuse

AGM battery, 12V 92Ah with disconnection relay, with automatic charger and additional battery booster

Shut-off relay for 12 Volt refrigerator function

AWARD-WINNING!

PICK-UP CABINS IN TEST

Anyone promising quality should also be tested:

Our cabins subjected themselves to a number of tests and came away with not one but two awards: We are proud of the awards "The Perfect Camper 2016" and the "Seal of Cabin Quality 2017" which show that we deliver what we promise!
