Important information

All accessory prices are for factory installation. Subsequent installations are subject to additional costs. Any change to the factory settings of your vehicle can lead to impairment of driving or road safety. Accessories recommended by us and original replacement parts have been specially developed for your vehicle and approved by us. Your LMC dealer carries these products; he/she is informed of permissible, technical particulars, and performs the necessary work in a competent manner. Accessories, fixtures, conversion or assembly parts that have not been approved by LMC can lead to damage to the vehicle or impaired road safety. Even if there is an expert opinion from a specialist regarding the part, a general operating licence for the part, or a type-approval certificate, this does not presume the proper constitution of the product. Please understand that no liability can be assumed for damages caused by products that have not been approved by LMC, or by unauthorised modifications.

The weight in roadworthy condition* corresponds to the series design without optional extras. Installation of optional extras increase the weight of the caravan in roadworthy condition*, and the cargo load is reduced accordingly**. Please take the weight of the optional extra into account with regard to the cargo load**.

Changes to prices, technical data, fixtures and furnishings, as well those regarding creative aspects, remain reserved. Information about scope of delivery, appearance and services, correspond to the information available at the time of printing. Deviations of +/- 5% are possible in measurement and weight data. The cargo load** derived from it can vary correspondingly. Our weight information complies with requirements of EC-Directive 661/2009 and Regulation (EU) 1230/2012.

* This weight includes the standard design dimensions according to manufacturer information: Liquid, such as fresh water, gas (aluminium bottles) at 100 % and cable drums, without optional extras. This corresponds to a weight of approx. 33 kg (Sassino), approx. 36 kg (Style, Style Lift and Vivo) and approx. 40 kg (Musica).

** The cargo load cannot be exceeded by personal equipment and optional extras.

For safe operation of 12 V devices in the caravan while driving, it must be ensured that the towing vehicle has sufficient voltage. With some vehicles it is possible that the vehicle's battery management switches the battery consumption unit off for protection. Obtain information about this from your vehicle manufacturer.

Depicted decorations are also not part of the scope of delivery. All information corresponds to the current status at the time of printing. We reserve the right to technical modifications to the construction and outfitting, deviations to the colour, or mistakes, colour deviations, are partially print or lighting related. Some illustrations include optional extras subject to extra cost. All prices are recommended retail prices in euros, incl. statutory value added tax ex works LMC.

The validity of all previously published price lists expires with the publication of this price list.

Valid from 01/08/2019.
