

2013

Can you walk on the roof?

Yes, we just had to do it. We know that, thanks to the Cabby method, we have the strongest and most torsionally rigid body on the market. And that it would be strong enough to take a car on the roof was something we weren't really worried about. Nevertheless, as the truck was about to lower the car, our hearts beat just that little bit faster.

Check out the story on pages 18-19 and see the film at cabby.se

You now have the Cabby range for 2013 in your hands. As usual, it's a bit better and a bit more state-of-the-art than previous years. We are constantly developing our processes to make sure we can always offer you the best caravan on the market.

Some of the new features to look out for this year include an increase in the ceiling height, a benefit not only to taller users but also because it creates a greater sense of spaciousness and atmosphere for everyone. Newly developed, ergonomic seat cushions with a softer profile and higher backrest cushions provide greater comfort and a feeling of exclusivity. And don't miss out on our new fabric options on pages 44-51.

A new Cabby is fully equipped from the start, but that doesn't mean any two of our

caravans need to be identical with each other.

With 33 floor layouts and sizes to choose from, the extra-totally-exclusive Caienna and fabrics, curtains, interior fittings and equipment - both as standard and in the form of optional extras - you can create precisely the caravan you've been dreaming about.

Cabby's clear design with harmoniously sweeping lines. Bathrooms inspired by boats and spas. Smart as well as practical kitchens with the best Soft Close system in drawers and cupboards on the market. Everything geared to provide comfort and pleasure that is out of the ordinary.

Caravanning, of course, is about pursuing new experiences and relaxing without necessarily leaving any of the benefits of civilization behind. With Cabby 2013, we show once again that you can demand at least the same high standards and comfort in a caravan as you experience at home.

Welcome aboard!

Hans Lindh, MD Cabby.

Warmest in winter – coolest in summer.

Since the company was founded in 1964, our caravans have been built in and for our Nordic climate. Our attitude has always been that you should be able to thrive equally well at the foot of a ski slope as under the sun at the height of summer. And while much has happened since founder Tore Nilsson presented the first Cabby to the world, one thing remains unchanged – the Cabby method.

This tried and tested technique forms the basis of the Cabby Comfort Concept, and remains unsurpassed when it comes to creating the most comfortable indoor climate on the market, both in summer and winter.

The secret behind the Cabby method is the highly-insulating polyurethane material we use to create a minimum of seams in the walls and ceiling. The highly-

insulating polyurethane foam is injected between the outer and inner walls, in the floor and ceiling to fill the void. This forms a sandwich structure that is extremely strong and stable. Using the Cabby method means that the cold is kept out in the winter and the warmth is kept out in the summer.

Read more about the Cabby method on pages 57-59.

Effective heating system

The Cabby method offers by far the best insulation on the market, and all our caravans also feature an unbeatable heating system that helps create greater interior comfort. Each caravan is fitted with warm water central heating. And with several heating coils in the floor and air gaps along the walls, you can enjoy an even and well-ventilated indoor climate.

Our prime focus is on safety.

The Cabby Safety System is the generic name for our safety systems. Comprehensive work that permeates every detail and takes precedence over everything else. Most of the time, you won't even be aware of it. And we would prefer it to be that way. But you can certainly feel it.

You can feel it when you're driving your car with the caravan in tow, particularly when roads and weather conditions leave a lot to be desired. And you can feel it when you're staying in your caravan. It's down to the most important part of the overall experience – a sense of security.

With a Cabby you get an easy-to-tow caravan with track stability. This is largely thanks to our

scrupulous safety work. All our caravans have an extremely well-balanced chassis, specially produced for Cabby and to give the body the correct degree of stability. What you get is a unique suspension system that can cope with all types of road surface, as well as nitrogen-filled tyres that minimise variations in tyre pressure. The ATC prevents the caravan from snaking all over the road and the

AKS stabiliser hitch has a stabilising effect.

Extra strong and stable

The Cabby method, combined with the Power Lock technology that locks the transitional sections between ceiling, front and wall without creating thermal bridges, makes the caravan extremely strong and stable.

Read more on pages 54-56.

Feel and squeeze.

When you step into Cabby 2013, the first thing that will strike you is the feeling of authenticity. The interior fittings featuring apple wood and fresh textiles, the smooth lines and our unique Soft Close kitchen drawer system are just some of the details that will quickly make you feel at home. So feel free to touch, press, open and grab hold of hatches, doors and interior fittings – they all bear closer inspection.

Now the best ceiling height on the market is even better than before.

Cabby already had a generous ceiling height but this year we've made it even higher to create a greater sense of spaciousness and atmosphere. The sitting area offers superior seating comfort and space – you don't need to sit with your head in the curtains in a Cabby!

Two-mode night light.

A discrete array of lights above the kitchen cupboard doors to soothe children who are afraid of the dark and guide you through the caravan in the middle of the night. For a stronger night light or cosy lighting, you can switch on the overhead lights as well as the lights in the wall cupboards.

Work surfaces like at home.

The work surfaces in all our caravan kitchens have been designed to make you feel at home. A practical feature includes the removable draining board that fits over the sink to give you even more room. The board can be stored in a kitchen drawer when not in use or when travelling.

Now even more spicy.

Our extra-totally-exclusive series is here to stay. This year it also includes headrests, external Calor gas outlet, city water connection, gas change-over switch for two bottles, fire extinguisher and Big Foot. *Read more on page 22.*

NEW FEATURES

Excellent lighting.

Our caravans feature several light points including night lights, LED lighting, spotlights with dimmer switches, and loading and storing lights as standard.

Newly-developed, ergonomic seat cushions.

With a softer profile and higher backrest, our new seat cushions are suitable for everyone. Generous seat depth and a change in the ergonomics of the seat cushion provide the very latest and best in sitting comfort.

Even better heat distribution.

Substantial storage compartment (1000mm) with lighting. Accessible from inside as well as outside. This year, we've even equipped it with an *air control vent** of our own design that ensures maximum circulation of warm air.

* unique to Cabby

Kitchen like at home.

With smart solutions, an airy design and a truly authentic feel, the kitchen in our caravans is the first thing you'll see when you step inside. Apple wood, soft shapes and a robust feel, augmented with smart solutions that you probably don't even have in your kitchen at home.

Always well equipped. A Cabby has everything you need fitted as standard – and a little more besides. Yet you still have a wide range of options to choose between in order to personalise your caravan. For example, the accent wall in the kitchen is available in a range of several different variants. Four burner gas cooker, convenient additional work surface with storage in all corner units and Soft Close on all kitchen drawers are just a few examples of our standard equipment. The LED lighting that has replaced all the halogen bulbs is not only energy-efficient, but also has a long life.

Proper bathrooms.

Taking inspiration from the boating sector, we have filled our bathrooms with smart solutions and a real spa feel. Last year's big successes, our LT/FT models, are the obvious choice if you want to have a real bathroom. For example, they offer *the largest shower area** on the market and the opportunity for you to choose which side you want the toilet to be.

*unique to Cabby

It's the details that make the difference. Despite a constant battle against gravity, with demands for caravans that are as light as possible, we've succeeded in creating caravans with a truly authentic feel. Cabby caravans last for years and cope with being used extensively.

The winter caravan.

Cabby is the obvious choice for those of you who want to use your caravan all year round. With superior insulation, many unique solutions and adaptive equipment, the caravan is built and optimised for use in all four seasons of the year. Thereby ensuring comfortable, trouble-free accommodation regardless of whether the temperature outside has a plus or minus in front of it.

More comfortable indoor climate

Cabby is designed for a harsh winter climate. What you get is a caravan with a comfortable temperature inside, when the cold makes itself felt outside. This is mainly down to the highly-insulating material, polyurethane, used in the construction of all our caravans to create a more comfortable indoor climate all year round. *Read more about the Cabby method on pages 57-59.*

Comfortable under foot

Every Cabby features good-sized air gaps to help create an even, well-ventilated heat. Our warm water underfloor heating system with several heating coils ensures a pleasant feeling of warmth when you put your feet down on the floor of your caravan. A *heated drainage system** is fitted as standard in all our caravans to prevent ice blockages.

Warm, dry shoes and clothing

All Cabby caravans have a heated shoe compartment as standard, and most models feature a *drying cupboard with a ventilation fan**, so that you can always dress yourself in warm, dry clothes before heading out into the winter cold. To help keep your ski equipment in order, all caravans feature a ski compartment with lighting that you open from the outside.

*unique to Cabby

- The best indoor climate on the market
- Thanks to the *Cabby method** we have unbeatable insulation throughout the caravan that also makes it energy-efficient
- Central heating with three output settings
- Warm water underfloor heating for the best possible heat distribution
- Well-adapted air gaps that help create even, well-ventilated warmth
- *Drying cupboard with ventilation fan** in most models
- Ski compartment and storage space with lighting
- *Heated drain**
- Heated shoe compartment
- *Air control vents in storage compartments** for maximum circulation of warm air

* unique to Cabby

Focusing on reducing energy consumption is a matter of course these days. Thanks to its superior insulation and intelligent heating system, combined with LED lighting and other smart solutions, the Cabby 2013 is an incredibly energy-efficient caravan.

Can you walk on the roof? Strength in every detail.

Thanks to the Cabby method and Power Lock, we have the strongest and most torsionally rigid body on the market – something that provides you with not only the best-insulated but also the most stable caravan to tow behind your car – and lifting a car up on to the roof is, we think, proof as good as any of this claim. Check out the film at cabby.se and see what happened.

NB! The images on display are NOT a montage.

Caienna — for people who don't want to choose.

Cabby caravans have one of the highest levels of equipment on the market as standard. But Caienna is really something special, a caravan where no expense has been spared. We've created a caravan for people who don't want to compromise.

Caienna is an extra-totally-exclusive

equipment alternative for your Cabby. You decide for yourself on the size of caravan, the layout and the soft furnishings you want. The rest is carefully put together to ensure you experience something new and that extra bit special. A caravan with all the extras (and we mean

all). Caienna offers comfort you can enjoy, whether holidaying in the depths of winter or the height of summer. Our exclusive series will take your caravanning experience to a higher level.

As standard in Caienna

- Individually adjustable underfloor and radiator heating with a unique switch between the temperature sensors in the front and rear sections of the caravan
- Cooker UK-style four-burner gas cooker with oven and grill (door at the bottom)
- Aluminium media pole at rear with 230 V, antenna and DVD
- Media centre/DVD
- TV bracket with swivel arm at rear
- Kitchen worktop, coffee table, dinette table, TV/entrance furniture in black laminate
- Kitchen overhead cupboard doors in frosted, black acrylic
- Kitchen glass cabinet and door for glass cabinet in the walk-in wardrobe in black acrylic
- Designer tap in kitchen
- Bathroom tap cascade model
- Brushed aluminium on the kitchen wall and the front of the refrigerator
- Wave-shaped headboard in frosted acrylic with LED lighting
- LED lighting with aluminium fittings next to beds and corner shelves at front
- LED lighting with dimmer switch and aluminium fittings in ceiling above sofa at front
- Large refrigerator with separate freezer
- Electric towel dryer
- Headrests
- Two speakers at rear
- Microwave oven (not applicable to 700 LTF and LTD)
- Omnidirectional antenna
- Exterior Calor gas outlet
- City water connection
- Calor gas change-over switch for two bottles
- Fire-extinguisher 1kg
- Big Foot
- Mosquito net door
- Shoe compartment doors in ends of dinette
- Black waist-line trim, exterior
- Caienna decals, exterior
- Tail light section in black acrylic and chrome light fittings

In the Caienna, the black worktops in the kitchen, brushed aluminium on the kitchen wall and other exclusive details come as standard. All of these extras are present from the outset.

A model for every taste.

Sleeping alone or together? Room for all the family or extra beds when required? There's plenty to think about and decide on. Finding a model in our range to meet your needs is easy.

To make it even easier for you to make the right choice from our model range, we've divided our caravans into four categories: Single, Double, Flexi and Family.

SINGLE

For those who prefer to sleep in separate beds. Single is available in sizes 620 – 800.

DOUBLE

When you want to sleep in an ordinary double bed. Double is available in sizes 570 – 740.

FLEXI

The sitting area and the upper bed cupboard can easily be converted to create two extra beds. Flexi is available in sizes 620 – 800.

FAMILY

Family caravan with bunk beds for the children. Some of our caravans have a separate children's compartment, too. Family is available in sizes 620 – 800.

L Single

L Single is a caravan for people who, above all, want spacious comfort and a bed of their own to sleep in. The practical kitchen, bathroom and wardrobe are located in the middle of the caravan. You can sit in comfort in the pleasant sitting area at the front of the caravan and simply convert it into a sleeping area at night.

Cabby 620 L

Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Total weight	1570-1800 kg

LTD and LTF Single

The caravan for people who like smart solutions. Irrespective of the size, you will be amazed at the different areas offered. This is particularly true of the completely new bathroom, with its wonderful spa feel, located right at the back of the caravan. You will find it has the most spacious shower cubicle on the market while giving you the option of deciding which side you want the toilet to be. That's what distinguishes LTD from LTF. (LTD, toilet on door side, and LTF, toilet on window side.)

Freedom of choice

As an option, you can select a wardrobe instead of the shower.

F3 Double

F3 Double is one of our most popular models. The ample double bed is fitted at the rear of the caravan, while the sitting area in the front compartment can easily be converted to create extra sleeping places. The well-equipped kitchen area completes the caravan.

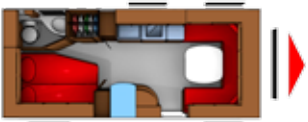

Cabby 570 F3

Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Total weight	1570-1800 kg

Double – for maximum comfort

F4 Double

FT Double

FT Double is the perfect caravan for those unwilling to compromise on comfort or quality. The caravan is fitted with a generous-sized double bed and smart storage. The bathroom and shower are at the rear of the caravan.

Cabby 650 FT

A-dimension	1050 cm	Internal length	585 cm
Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Total weight	1570-1800 kg

Cabby 740 FT

A-dimension	1135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Total weight	2400 kg

FM Double

With *FM Double* you get a caravan with a practical layout. The bedroom is screened off from the rest of the interior and has a good-sized double bed. Equipped with everything you need, the kitchen area is in the middle of the caravan and the U-shaped sitting area can easily be converted to create extra beds.

Cabby 740 FM

A-dimension	1135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Total weight	2400 kg

Two practical full wardrobes with lighting on both sides of the bed.

FM Double

M Flexi

With *M Flexi* you get a wonderful caravan with a multi-purpose layout. The sitting area at the front of the caravan functions as a dining area during the day and sleeping area at night. The caravan's smaller sitting area and upper bed cupboard can easily be converted to create extra beds at night.

Cabby 700 M

A-dimension	1135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Total weight	2400 kg

FTM2C Family

FTM2C Family is a large family caravan with a lot of space and smart storage solutions. The caravan is fitted with a double bed and bunk bed. The entirely newly developed bathroom with its spa feel offers the largest and best shower on the market and is situated right at the back of the caravan. The layout also includes substantial storage space under the double bed, which you can access both from the inside as well as the outside.

Cabby 800 FTM2C

A-dimension	1195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Total weight	2400 kg

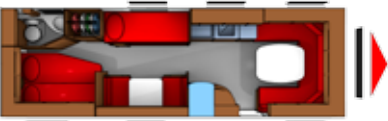

F3F Family

F3F Family is a caravan with plenty of space for the large family. It has a practical, pleasant kitchen, a spacious sitting area, a smaller sitting area that can be converted into a bed, a bunk bed and, at the rear of the caravan, a double bed and bathroom.

Cabby 800 F3F

A-dimension	1195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Total weight	2400 kg

F2C Family

F2C Family is perfect for the family with small children. The bedroom is fitted with a double bed and bunk bed. The longer caravans have a separate sleeping compartment right at the back. Toys, games and clothes can be kept in the smart storage spaces and there is plenty of room at the front of the caravan for enjoyable meals together.

Triple bunk bed available as an optional extra.

Cabby 620 F2C

Cabby 800 F2C

A-dimension	1195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Total weight	2400 kg

Like at home or different?

With our large selection of fresh, fashionable and timeless textiles and leathers, you have plenty of opportunity to find your own particular favourite. And set your personal stamp on your Cabby. All the fabrics are woven in a hardwearing and easy to maintain material that is specially produced to suit the rest of the interior fittings.

Newly-developed seat cushions.

This year's seat cushions have been completely redesigned. With a softer profile and higher backrest, our new seat cushions are suitable for everyone. The well-proportioned seat depth is the same but the ergonomics of the seat cushion have been changed to provide the very latest and best in sitting comfort. We are, of course, using the same padding as before in the form of highly elastic cold foam which retains its shape and recovers quickly. All of this aimed at providing the ultimate in seating comfort.

NEW FEATURES

MARIA

Shade upon shade of classic grey, from upholstery to curtains, make Maria a smart basis on which to mix and match to create your own unique style. Everything goes with grey so, with Maria, you can really go to town. Just let your imagination run riot.

New feature!

FANNY

Is our loyal friend who has been with us for a few years now. She is still as popular as ever. A calm and comfortable upholstery in dark brown and beige with a sprinkling of flowers on the cushions and curtains.

GABRIELLA

Last year's major success - both classic and modern at the same time. Chintzy curtains in traditional Swedish design and cushions in plum and grey. New features this year include a lined bedspread and matching pillows.

**CAMILLA**

With Camilla you get a light, attractive caravan. She is well suited to the challenge of individual colour details. Choose the version with normal curtains or with our attractive panel variant, which is available as an option.

INEZ

To put you in mind of the sea and a beautiful blue summer sky. These curtains are modern with a Swedish-designed flower print. The flax blue colour is perfect for Cabby's apple wood walls. New features this year include a lined bedspread and matching pillows.

EVELINA

A wonderful red shade of upholstery that perfectly matches the Swedish-designed chintzy curtains. A truly stylish, classic choice.

SARA

Upholstery in two of this year's fashionable colours. Cushions in a brown Alcantara fabric, which is easy to clean and keep clean, matched with curtains in a lovely warm, green tone, repeated in the decorative cushions. This upholstery will give you a modern caravan with warmth and harmony.

New feature!

**BEIGE LABEL**

One of our more luxurious upholsteries in soft, beige leather. She has fashionable panel curtains in light colours with matching cushions. Even though the style is luxuriously adult, she is also suitable for families with children, as she is durable and easy to keep clean.

GREY LABEL

Grey Label is our popular leather concept in grey. The leather is soft to the touch and easy to keep clean. The modern curtains let in a pleasant amount of light and convey a European feel. New features this year include the lined bedspread and pillows.

BLACK LABEL

Our upholstery in black, shiny leather. The unique bright red Cabby flowers on the other textiles give Black Label a softer impression. A good choice for lovers of style.

OPTIONAL EXTRAS***New feature!*****Tilda panel curtains**

Neutral panel curtains that can be ordered as an optional extra for all fabric choices. There are two sets of pelmets, one grey and one beige. This is to give you more opportunities for mixing and matching.

Beauty comes from within.

Here at Cabby, we devote a great deal of time to designing, shaping and equipping our caravans. Some of these are practical advances, while others raise the aesthetic bar. However, a great deal of what makes a Cabby a Cabby is hidden beneath the skin. Features that cannot be seen, but that make a real difference when it comes to safety and comfort. We're talking here about the materials used in the walls and under the floor – smart, unique solutions that add to the comfort and enjoyment of your Cabby. On the following pages we explain some of the properties that make our caravans a particularly good investment.

Cabby Safety System.

The Cabby Safety System is the generic name for all our safety systems. They include a number of unique features that together offer the safest caravan by far to tow behind your car.

Driving your car with a Cabby in tow will give you nothing but pleasure. Whether your journey takes you long distances on dead straight motorways or on narrow, winding roads in the depths of the countryside. The secret lies in the well-balanced chassis from AL-KO combined with a highly torsionally rigid body.

The chassis forms the basis of the caravan and has an important effect on its driving characteristics and the strength of the body. A correctly designed chassis ensures good towing characteristics

and does not expose the driver to any unpleasant surprises. It also gives the body the correct degree of steadiness, actively contributing to maximising driving stability.

Brackets

Cabby's chassis, with extra long traction spars, is equipped with four supporting brackets along the sides. These support the weight of the sides and minimise the risk of the floor becoming bowed. The brackets concentrate the strength

of the body, giving the caravan horizontal stability and minimising stresses imposed on the floor and interior fittings.

Axle and wheel attachment

The fact that the chassis is horizontally stable is an important factor in locating the axle and the tracking of the wheels. A stable axle and wheel attachment is an important contributory factor for track stability which, in the final analysis, minimises tyre wear, too.

Thanks to ATC, you can feel safe behind the wheel, on poor roads as well as when oncoming traffic gets too close or you have to take sudden evasive action.

The corner steadies are secured to the chassis' longitudinal beams. This provides additional stability.

For many years, Cabby has been engaged in continuous development work to produce roadworthy chassis designs. This research has led to all Cabby's models being based on a design that gives the floor and body the full support of the chassis.

The function of the cross members is to provide support for the longitudinal side members in order to avoid distortion and to stabilise the axle beams and axle.

Aisle beam

The Cabby chassis lies directly under the floor and supports it along the full length – and width – of the caravan. There is also a supporting aisle beam underneath the caravan's aisle that ensures the floor will not start sagging after a few years. A stable floor is of crucial importance, particularly bearing in mind the warm water heating system in the floor.

Corner steadies

This makes the caravan stable when parked and minimises the risk of developing a soft and wobbly floor. Floor problems are common in older caravans of other makes.

Delta axle

The dimensions are allocated with millimetre precision in the chassis and axle for each caravan model, depending among other things on its weight and length. The suspension is optimised to cope with all types of road surface and changes in direction. Thanks to the precise suspension tracking of the Delta axle, you can rely on your Cabby to be stable on any road surface without giving you any nasty surprises.

ATC – AL-KO Trailer Control

The ATC anti-snaking system has been a standard specification since 2007 on caravans from Cabby. ATC manages to automatically correct the oscillating motions (snaking) that can occur when making evasive manoeuvres and at 'critical speed', which varies depending on factors including the car, the load, the nature of the road, the caravan and weather conditions.

How the ATC anti-skid system works

Well-judged braking stretches out the unit and the snaking is corrected, gently and smoothly before you have even noticed it is happening. ATC is a

- Globally unique ATC anti-snaking system
- Torsionally rigid and well-balanced chassis for maximum roadworthiness
- Delta axle that helps create a lower centre of gravity
- Optimised suspension to cope with all types of road surface
- AKS stabiliser hitch provides stabilising effect
- Nitrogen-filled tyres

unit with sensors, control electronics and a traversing motor connected to the caravan's brake system.

The sensors constantly monitor the caravan's lateral movements and continuously send signals to the control unit, which determines whether it has to do anything to maximise driving stability. The control unit can trace oscillating tendencies at an early stage as well as distinguish them from other lateral movements such as long bends and tricky road conditions. It can also sense whether the snaking will abate on its own or not. In the latter case, the caravan's service brake is activated by means of the traversing motor and the unit is gently braked.

AKS stabiliser hitch

The AKS stabiliser hitch provides a stabilising effect. It does this by means of a friction lining that presses against the car's tow ball. In situations where you are being overtaken by large vehicles, the hitch reduces the lateral forces that arise from the slipstream of the overtaking vehicle. Together with other units in the Cabby Safety System, the AKS stabiliser hitch

offers superior roadworthiness.

Tyres and rims

To ensure maximum road-holding and safety, all Cabby caravans are fitted with 15" aluminium rims (14" on caravans with tandem axles). The tyres are also filled with nitrogen instead of air in order to extend their service life. The nitrogen means that the pressure remains constant over time without being affected by the temperature. A feature that also benefits safety, fuel consumption and, not least, the environment.

Safest on the road

A clear indication of the integrity of our safety systems lies in Husvagn & Camping's caravan test, in which Cabby was awarded the most points in the "On the road" category. The secret lies in the ATC anti-snaking system which is fitted as standard to all our caravans. See the double test in Husvagn & Camping, May 2009.

The Cabby method.

One of the biggest reasons for choosing a Cabby is the supreme comfort offered by each of our caravans. The chief reason for our comfortable indoor climate is the Cabby method which offers by far the best insulation on the market.

The Cabby method includes well-proven technology used in the construction of all our caravans and is based on an extremely highly-insulating material (polyurethane) which creates a minimum of seams in the walls and ceiling. This construction keeps the cold out in the

winter and the heat out in the summer. It also helps give the caravan increased stability and road-holding capability.

How the Cabby method works

The sides, floor and roof of the caravan are constructed in complete units. We

inject highly-insulating polyurethane material between the outer and inner walls, in the roof and the floor. The polyurethane expands and hardens in every nook and cranny of the unit. A stable sandwich structure is formed, with plywood on the inside and strong

aluminium panels on the outside. The construction is immensely strong with very few wooden joists, thus minimising the risk of thermal bridges.

Polyurethane

Polyurethane consists of insulating microscopic gas bubbles with a closed cell structure. These are resistant to moisture, an important property due to the fact that as little as one per cent of moisture in the material will reduce insulating capacity by 25 per cent. Damp insulation is also, of course, a breeding ground for micro-organisms and mould.

Durability

The insulation we use is proven to have good ageing properties. Polyurethane insulation retains its essential qualities for well over 100 years and the technology is increasingly gaining ground as an effective insulation material, especially in the building industry where energy issues have come to the fore. The superior insulating qualities of polyurethane are becoming increasingly in demand.

Thermal conductivity

The type of polyurethane foam (PUR) used in Cabby caravans has a thermal conductivity of $0.024 \text{ W/m}^\circ \text{ K}$, while insulation of the Ecoprim type, which is used by some of our competitors, has a thermal conductivity of $0.030 \text{ W/m}^\circ \text{ K}$.

This means that Cabby's PUR insulation has a 25 per cent better insulating capacity (K value) than Ecoprim insulation.

A small comparison

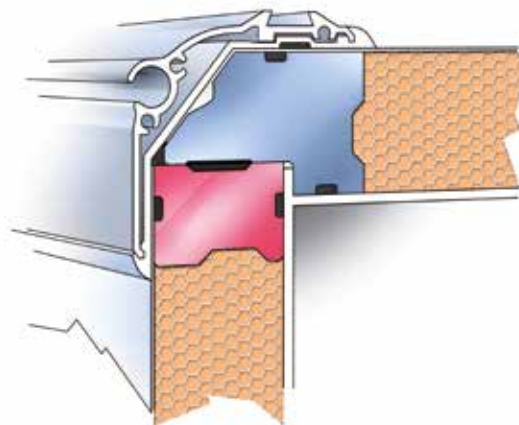

Cabby has 32 mm PUR insulation in the walls and roof, and 36 mm PUR insulation in the floor. To highlight the difference, comparisons can be made with other materials used to insulate caravans and buildings. The conclusion is obvious – even though other caravan manufacturers use thicker insulation than Cabby, they do not have sufficiently thick insulation to approach Cabby's insulating qualities.

Cabby's heating system

All our caravans are equipped with warm water central heating and several heating coils in the floor. The heating system creates a more pleasant indoor climate, heats the drainage outlet and reduces the risk of the water freezing. The heat even reaches spaces where you keep items such as shoes and ski boots.

Controls

There are air gaps behind the sofas, beds, overhead cupboards and kitchen units to ensure the heat in your caravan

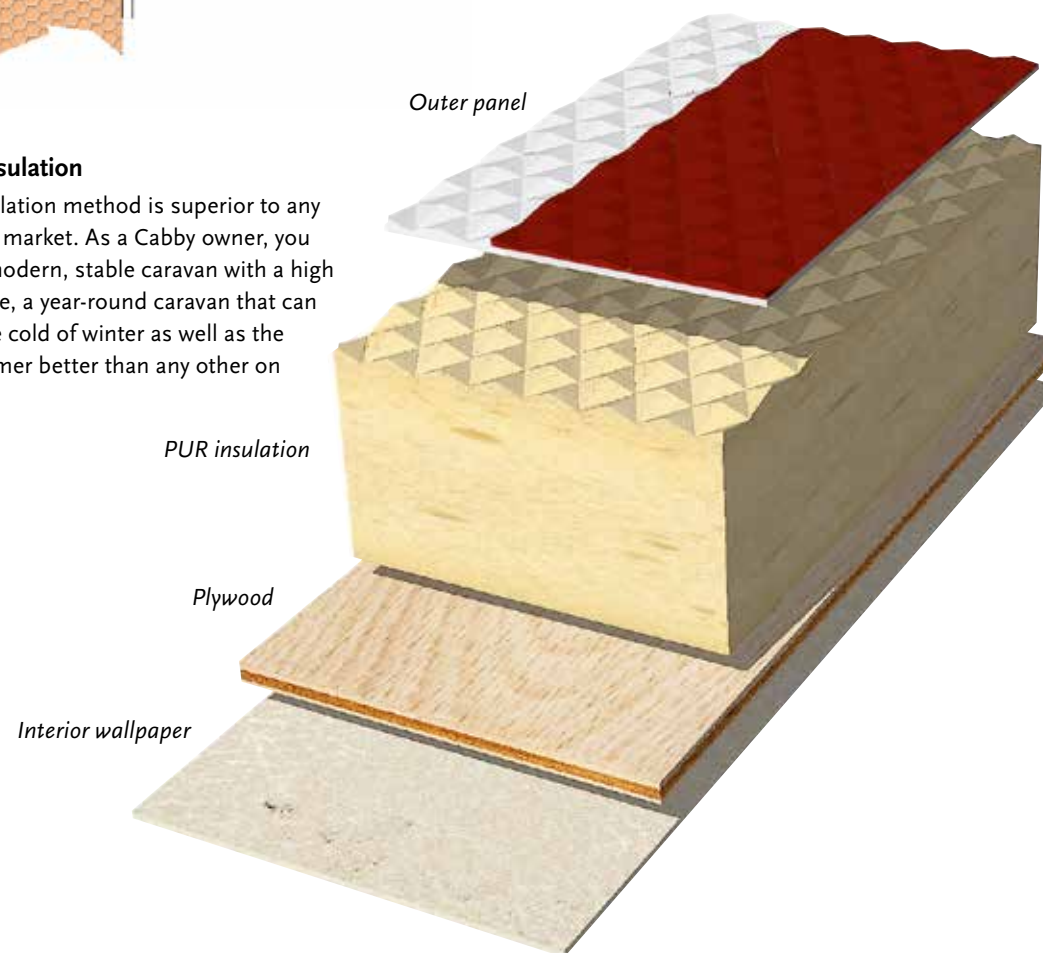

Superior insulation

Cabby's insulation method is superior to any other on the market. As a Cabby owner, you will have a modern, stable caravan with a high trade-in value, a year-round caravan that can deal with the cold of winter as well as the heat of summer better than any other on the market.

The most torsionally-rigid body on the market

The Cabby method's unique qualities, in combination with our polyurethane profile – Power Lock – which locks the transitional sections between roof, front and wall without creating thermal bridges, makes the caravan extremely strong and steady. The result is a self-supporting structure and the most torsionally rigid body on the market by far.

is as evenly distributed and ventilated as possible. The whole of the heating system is easy to regulate using the control panel strategically placed in the kitchen area. At the heart of the heating system is an Alde Compact central heating boiler 3/5 kW (electric/Calor gas). The boiler has three output settings and operates with both 230 V and Calor gas.

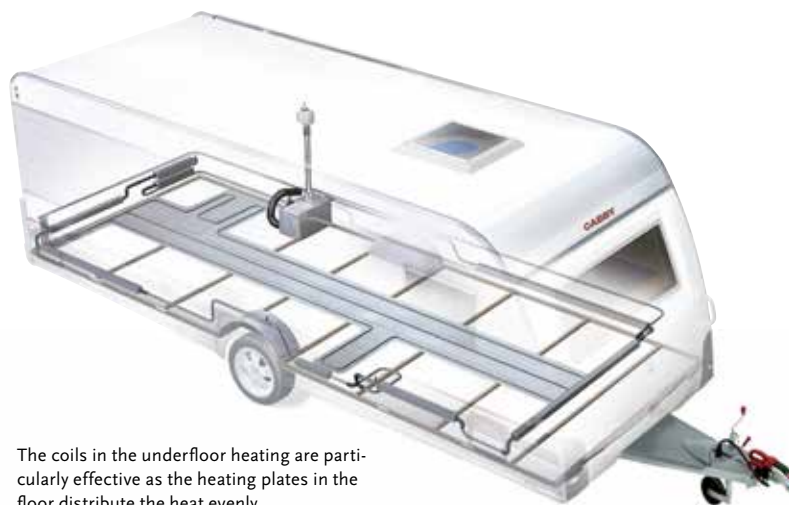

Heat transfer

In addition to the insulating effect, the Cabby method means that the heating pipes in the floor distribute heat evenly over the entire floor surface via the heating plates. The superior insulation also ensures the heat does not find its

way down to the underside of the floor, but gives maximum benefit to the interior. The underfloor heating system is also equipped with individual shut-off valves.

Capacity

Cabby's superior insulation also contributes to extending the envelope for the outside temperature with which the caravan can cope using a 10 Amp fuse. Very few campsites currently offer 16 Amps, which is required in order to utilise the full 3 Kw capacity of the boiler at 230 V.

The coils in the underfloor heating are particularly effective as the heating plates in the floor distribute the heat evenly.

- **Unbeatable insulating qualities throughout the caravan**
- **Warm water central-heating with three output settings**
- **Several heating coils for even and comfortable heat distribution**
- **Good-sized air gaps that help create even, well-ventilated warmth**
- **Walk-in wardrobe in most models and shoe compartment with heating coils**
- **Heated drain***
- **Wide door with interrupted thermal bridge**

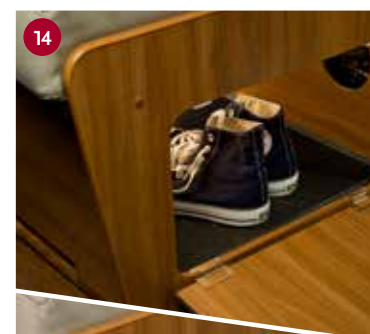

* unique to Cabby

Standard equipment that is always included.

Cabby maintains a high standard from the outset without this costing you any extra. What you get is a caravan with exciting features and interesting solutions that other manufacturers class as optional extras. You can see below what is included when you invest in a caravan from Cabby.

1. Soft Close system and sorting-at-source container in the kitchen
2. Sturdy aluminium manoeuvring handles
3. Plenty of storage space; all wardrobes have lighting
4. LED lighting throughout the caravan
5. UK-style four-burner gas cooker
6. Drying cupboard with ventilation fan and protective cover in most models
7. Gas leak tester
8. Ski compartment with LED lighting
9. Wide storage compartment, with LED lighting, that can be accessed from both inside and outside the caravan
10. Adjustable head end, divisible in double bed
11. Transparent sunroof 50x70 cm, Midi Heki, with lighting, with mosquito net and black-out
12. Aluminium rims
13. Dometic refrigerator 189/122 litres
14. Shoe compartment with heating coil
15. Over-rim mixer tap in the kitchen
16. Practical kitchen storage
17. Soft-close overhead cupboard

Always in a Cabby.

Guarantee

- 5 year water-ingress guarantee
- 2 year overall guarantee

Cabby Safety System

- ATC anti-wobble system
- AL-KO chassis
- AKS stabiliser
- Delta axle with rubber torsion
- AL-KO tow bar cover
- High positioned brake light
- Gas leak tester
- External heating connection
- Residual current device

Cabby Comfort Concept

- Waterborne underfloor heating with several heating coils
- Alde Compact boiler 3/5 kW (electric/Calor gas)
- Waterborne radiator system
- Shoe compartment with heating coil
- Drying cupboard with ventilation fan (not 620 L, F2B, F2C)
- Heated drain
- Hot water
- The market's best insulation with high-efficiency polyurethane
- Internal wastewater tank 25 litres
- Wide and well-insulated outer door

Kitchen

- Soft Close drawers
- Cooker hood ventilator fan with two speeds
- Four-burner gas cooker
- Kitchen lighting (LED)
- Over-rim ceramic mixer tap in kitchen
- 45 litre water tank with exterior refilling
- Dometic refrigerator 189/122 litres
- Sorting-at-source container

Bedroom

- Pull-out underbed storage with hydraulic dampers
- Anatomic viscoelastic mattresses: Bultex 8 cm and Sensus 6 cm
- Adjustable head end, divisible in double bed

Bathroom

- Revolving cassette toilet with flushing
- Bathroom lighting (LED)
- Underfloor heating
- Ceramic mixer tap

Media

- Awning fittings with connection for cable-TV
- Speakers in sitting area
- Pre-installed audio and video cable for DVD

Miscellaneous

- 15" aluminium rims (14" on caravans with tandem axles)
- One-key system
- Awning lighting (LED)
- Aluminium manoeuvring handles
- Indoor/outdoor temperature gauge
- Transparent sunroof Mini-Heki 40x40 cm in bathroom and in bedroom with mosquito net and black-out
- Transparent sunroof Midi Heki 50x70 cm, with lighting, with mosquito net and black-out
- Exclusive ergonomic sofa cushions (Bultex)
- Underbed storage with LED lighting that is accessed both from inside and outside (not 740 FM)
- Tinted openable windows (entrance door window not openable)
- Tinted double-glazed windows with polyurethane frame
- Cassette blinds with mosquito net and black-out
- Premium corner steadies on all caravans with tandem axles
- Lighting in Calor Gas storage compartment (LED)
- Over-cupboard lighting (LED)
- Lighting in wardrobes
- Ski compartment with lighting (LED)
- Soft-close overhead cupboards

Note that the external roof height can vary depending on the level of equipment fitted.

Design your caravan to be just how you want it.

Cabby's interior options are carefully designed to offer the best in comfort and functionality but also to give your caravan a more personal touch.

1. Panel curtains with two different pelmets, beige and grey
2. Replaceable accent wall in kitchen
3. Wardrobe instead of shower
4. Three curtains for bunk bed
5. Upper bed cupboard with protective rail
6. Triple bunk bed, width 70 cm, including three windows, bedspread and air gap
7. Electric towel dryer
8. Head cushions
9. Fire-extinguisher, powder, 1 kg
10. Omnidirectional TV aerial
11. UK-style four-burner gas cooker with oven and grill, as well as drawer at the bottom
12. Refrigerator door in brushed aluminium and microwave oven
13. Gas and burglar alarm NX5
14. Media pole in aluminium, rear 230 V, DVD, antenna
15. TV shelf with aerial, 230 V and DVD cable
16. Media centre DVD
17. Central vacuum cleaner

View us in detail.

By choosing one of our caravans you are acquiring the market's best insulation, an AL-KO chassis with ATC anti-snaking system and three underfloor coils with warm water heating. You are also getting a plethora of smart solutions that make Cabby one of the most comfortable caravans available on the market.

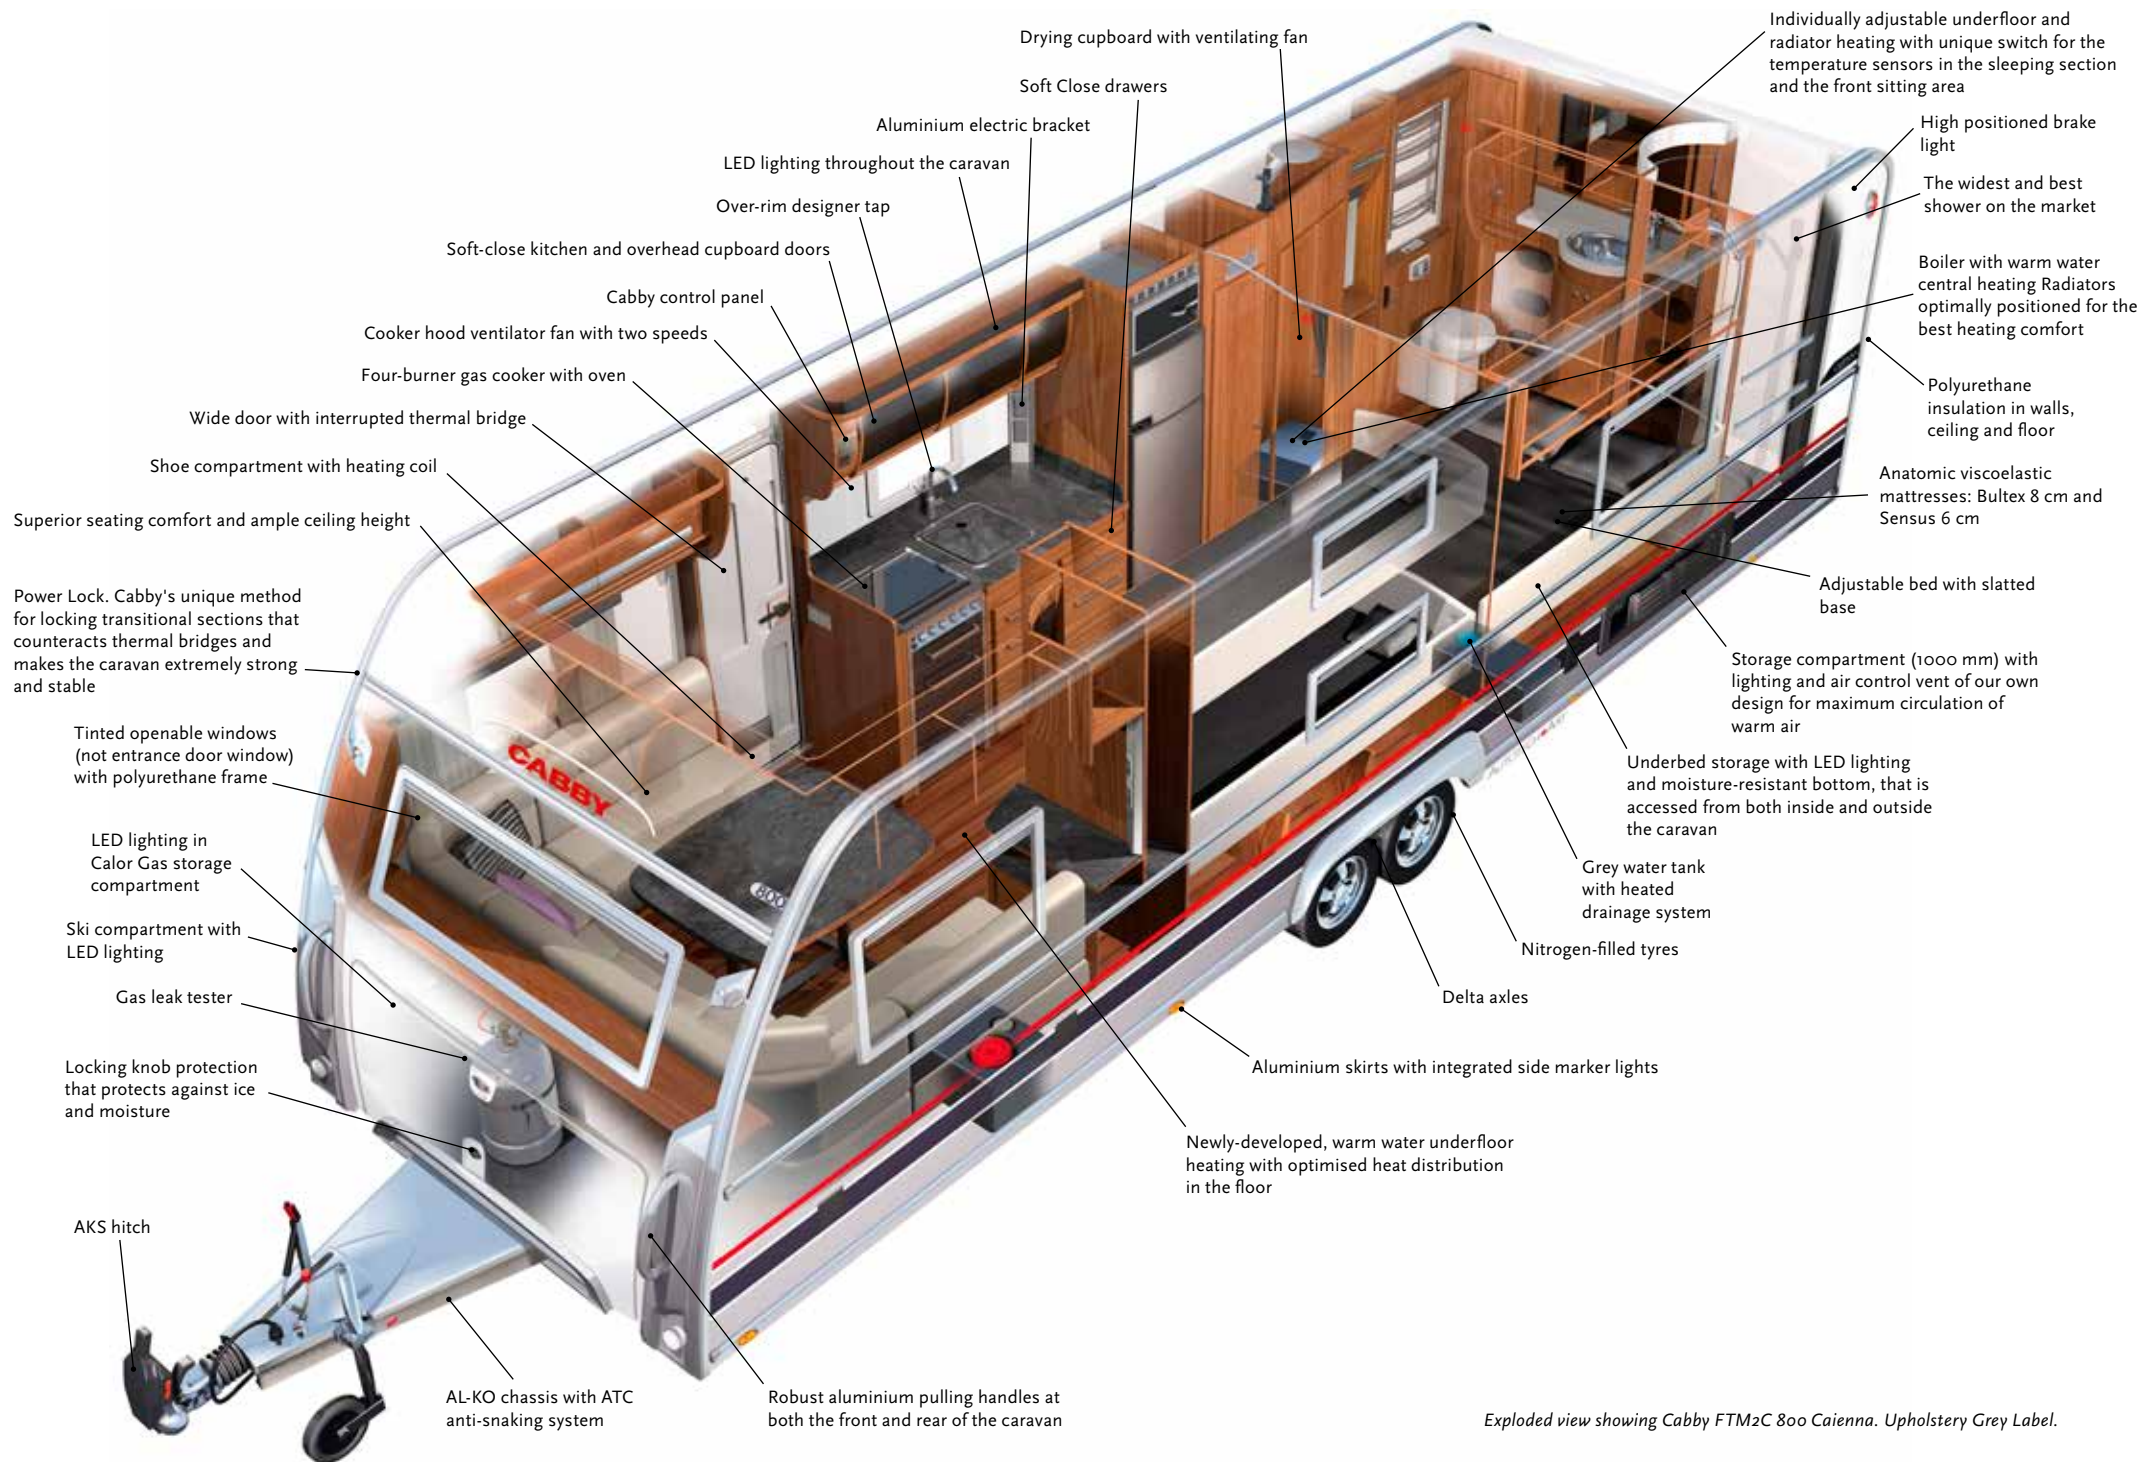

In a Cabby, you will sleep soundly at night in comfortable beds with adjustable head ends. The bathroom is practically furnished and has a toilet with electromagnetic flushing. Several of our caravans

also have a shower cubicle. There is ample storage space provided and Soft Close drawers in the kitchen. The practical kitchen area is tastefully furnished with everything you need. We have also provided for you

to sort your waste at source. Interior lighting includes ceiling lights, spot lights and bedroom lights, and the already cosy atmosphere in each caravan is further enhanced with the addition of carefully selected fabrics

of the highest quality.

You will find many sound reasons for investing in a Cabby. Which is why we are more than happy for you to view us in detail.

Exploded view showing Cabby FTM2C 800 Caienna. Upholstery Grey Label.
