Living

Relaxation opens up new spaces.

Based on advanced LLT technology and with a 12 year guarantee of water ingress*, we present to you the Breezer A – our take on the traditional alcove vehicle. Curtains up on this compact motorcaravan: with its surfaces in “Grano” wood decor and its three matching cushion alternatives, it exudes a certain personable flair, proving that an attractive ambiance is part and parcel of a good holiday.

DESIGN

The recipe for delightful cooking.

Whether it's a crisp salad or a giant bowl of fresh pasta; when passion for cooking meets LMC's intelligent kitchen design, enjoyment is guaranteed! And thanks to the energy-saving refrigerator with a remarkable 108 litre volume, in addition to the elaborate storage possibilities provided by the Breezer's kitchen unit, your supplies won't run out too quickly on longer trips.

Breezer A 714 G

Relax and enjoy the moment.

No matter how long your holiday lasts, you have to savour every moment – LMC and the Breezer A give you the best way to do just that. Typical of vehicles made in Sassenberg, the Breezer offers a comfortable Washroom with high-quality taps, a separate shower unit, atmospheric lighting and much more. Utensils can easily be stored behind one of the elegant “Cross-cut”-style hatches or in one of the many storage compartments. Larger pieces of luggage can be comfortably stored in one of the integrated garages.

Living

Your holiday is our passion.

The most important thing for us is making your idea of the perfect holiday into a reality. Our vehicles are made of more than just expertise and state-of-the-art technology; they have our hearts and souls in them as well. The Breezer V is a combination of the best of more than 50 years of LMC construction experience: LLT structural design technology with an extra-long guarantee of water ingress*, a comfortable ambiance in "Grano" wood decor – and with up to 180 horsepower, they're fun to drive, too. Visit the LMC dealer of your choice and let the Breezer V do the convincing!

Built with experience and vision.

Perfectly adapted to the needs of the modern individual – this claim seems obvious when it comes to the Breezer V. You can tell by the many practical details like the swivelling driver's and passenger's seats, the adjustable table or the self-closing drawer with its Soft-Stop feature, just to name a few. Form and function merge to create the perfect technology for a carefree holiday experience.

CRUISER SPORTLINE

Cruiser Sport Line T 712

Living

Dynamic. Powerful. Sporty.

Travelling to the world's most beautiful holiday destinations with the partially-integrated Cruiser Sport Line is a clear commitment to sporty mobility. The combination of tasteful visual ambiance in comfortable "Grano" furniture decor and the features you don't see – like the LMC light-weight construction or the standard-equipped water pressure system – make this the perfect holiday companion.

Cruiser Sport Line T 712 · Upholstery Allegra

Living

Holiday feeling included.

The interior of the Cruiser Sport Line comes with undeniable dynamic charisma. Sporty types will also appreciate the cozy atmosphere of the Cruiser Sport Line with upholstery in “Bella”, “Maura” or “Allegra” styles. Details accentuate the practical: a three-point seatbelt in the middle seating group or the self-closing drawers and Soft-Stop in the kitchen unit.

Due to the number of models, floor-plans and configuration possibilities, we are unfortunately unable to describe all models in detail in one catalogue. Please consider the descriptions to be approximate and bear in mind that the model descriptions and images also include special features that do not come equipped as standard upon delivery. All information refers to the current status of the vehicles at the time of publication of the catalogue and is subject to technical changes in construction and fitting, variations in colour and mistakes. Variations in colour may be due to the catalogue's printing or lighting techniques. Additional technical data and details can be found in our current price list.

LMC provides a 5 year guarantee of impermeability. This is increased to 12 years for vehicles with LLT. An annual inspection by LMC dealer partners is required.

Question/answer

For which reason does LMC construct all motorcaravans on AMC chassis with the level comfort regulation ALC?

Answer: We use the maintenance-free AL-KO AMC-chassis for all our motorcaravans, because this allows us to build our motorcaravans very low. In addition, with the ALC we obtain a perfect driving behaviour together with the best possible travelling comfort and the best possible driving stability. Even in loaded condition our motorcaravans are always straight and safely on the road and also driving onto ferries is therefore very uncomplicated and comfortable.

The extra space provided by a raised roof sounds enticing. But how much space does it add and how exactly does it work?

Answer: the roof is easily opened within seconds by simply loosening two tension belts. The extra space is easily reached by a space-saving ladder, and offers a comfortable retreat for two people. Windows with blackout curtains on three sides and a Heki window above provide an ideal sleeping environment and a good view. If the space is no longer needed or if the journey continues, the raised roof can be retracted with a few simple steps.

Why does LMC use newpressure jet systems since this year?

Answer: We want to continually improve our vehicles with regard to detail and provide our customers with perfect holidays. With the new pressure jet system, in connection with new fittings we took a further step forward and make your holiday experience more luxurious and comfortable.

A standard 12 year guarantee of impermeability for all vehicles with LLT technology, which includes every one except the Tourer – that sounds well and good. But how exactly can you be sure?

Answer: our innovative LLT technology is the result of several methods such as GFK protection (roof and floor), high-tensile PU bracings, a moisture-resistant high-performance insulated core made out of XPS and the continuing development of our leading LMC light-weight design technology. LLT technology prevents damage to the vehicle and offers reliable isolation and lasting impermeability against moisture. We guarantee it!

What advantages does the multiple-zone cold foam mattress by LMC offer me?

Answer: Peaceful and deep sleep are of great importance, even during your holiday. In order to provide you with the sleep you need, we have equipped all beds (including bunk beds) with our comfortable multiple-zone cold foam mattresses, which offer maximum support for every part of the body.

I like cooking and do so also frequently during holidays. How does the smoke detector behave with regard to water vapour?

Answer: Don't worry, you don't have to be afraid of a false alarm. The smoke detector is positioned in sufficient distance from the kitchen area and also our standard exhaust hood ensures that water vapour will be directly directed outwards.

Tradition and values

The legendary Knospe

1955

Serial production of the first trailer caravans

1966

View of the cabinet-making shop that has just been expanded

1981

Construction of the first liberty motorhomes

1986

until 1974

Fast-paced trend for the Lord and Münsterland series

1994

Winter-proof with 100% real wood furniture and as the only manufacturer with separate shower in the spacious bathroom – LMC was an early pioneer in the construction of motorcaravans

Then

The world is full of unique stories about discovery and leisure. So Heinrich Austermann – designing engineer – thought it was time to go on his way to realise his very own idea of freedom and adventure. As passionate designing engineer he wrote the first chapter in the success story of LMC with the birth of the two legendary caravans Falter and Knospe. This was at the beginning of the fifties – since then numerous caravans and motorcaravans set out from the factory in Sassenberg to you and then around the world. Heinrich Austermann would be proud that such impressive complete works have developed from the stories about and with LMC to date. We therefore continue to work using the latest technology and a great deal of passion for caravanning to live our mutual dream of perfect travelling.

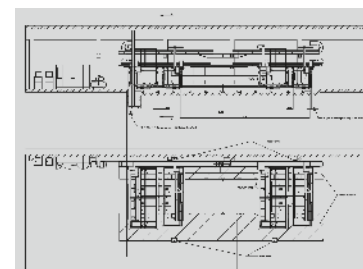

Water jet cutting machine

Edge processing centre

Hail protection roofs

New machining centre (realisation summer 2013)

2007

Investments from 2007 to 2013

2010

2011

2013

2008

Roofing assembly line

2009

Restructuring of the production

2012

Chassis hall, 1,300 sq. m

Today

And it doesn't stop there; our history goes on, just as impressively as it began. Every season, our designing engineers, product developers and technicians continue to work hard to make the next chapter of our history more exciting, more ambitious and more comfortable than the previous one. We have you to thank for the fact that our vehicles are at the top of customer and trade magazine bestseller lists worldwide. We are grateful that our customers have recognised the quality of our products and the integrity of our standards and that we have received top marks in the areas of optimised weight, winter expertise for travelling comfort. With the introduction of Longlife technology (LLT) and its 12 year guarantee of impermeability, we have once again placed ourselves at the forefront of international caravan manufacturers. And we think we can do even better: with the marriage of LMC and T.E.C., we are ushering in a new era in caravanning starting with the 2013/2014 season, and we look forward to blazing the trail into the future with together.

From vision to reality

“Why exactly are people so fascinated with the development of recreational vehicles?” is a question I’m often asked. “Everything”, I respond, and this is meant literally.

The sum of countless small details results later in a vehicle which offers comfortably space for several people and which accompanies them around the globe during the most beautiful time of the year. Nothing is left to chance – customers needs, new ideas and technical development must be brought together efficiently, so that the result is ultimately a vehicle that finds many fans and that contributes to a significant extent to happy holidays. Quality and attention to detail differentiate a good vehicle from an average vehicle. Sophisticated exterior design and interior design and well thought out floor plans go without saying. Vehicles of LMC comprise however also many invisible functions and a great deal of technology in addition, which deserve the title “Engineering art – Made in Germany”. Each and every LMC employee is very proud of this.

Michael Schmitz

XPS in the entire body

High-quality isolation made out of XPS foam keeps the winter cold outside of the vehicle. In the summer it keeps out the heat.

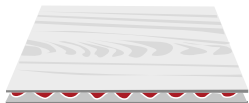

Wood-free construction

High-tensile PU moulding replaces the wood framework in the walls. Moisture-resistant XPS foam guarantees a long life.

GFK roof and underbody

The GFK roof effectively protects the caravan from extreme weather conditions such as hail and storm damage. The robust GFK underbody is adept at dealing with difficult road conditions.

Lightweight construction

A sophisticated mixture of materials, special production techniques and carefully-selected lightweight construction materials guarantees a high payload.

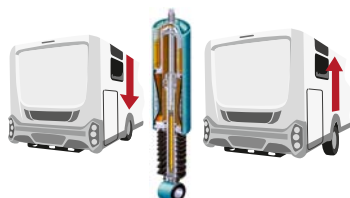

One-of-a-kind chassis frame technology

The maintenance-free AL-KO broad-gauge chassis with independent wheel suspension guarantees more safety, better handling and more comfortable ride.

|--|--------|-----------|-----------|--------------|------------|------------|-------------|-------------|----------------|

Dynamic level-control system

The AL-KO level controller constantly keeps the rear axel of the motorcaravan at an optimal level, even under heavy loads.

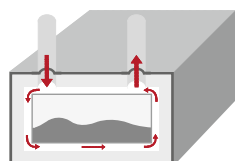

More safety while travelling

The ESP system guarantees safe driving in the motorcaravan. It prevents oversteering as well as understeering of the vehicle with targeted automatic brakes for individual wheels.

Functional double floor

Freshwater and wastewater tanks are located between the chassis beams. This creates the ideal weight distribution with a deep centre of gravity and minimises the vehicle's overall height. The heated and isolated tanks are perfectly equipped for the winter.

Ideal for winter

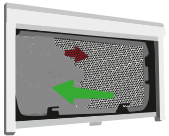

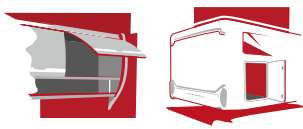

Heated and isolated water tanks allow for travelling in the cold months.

Parking assistant system

Keep everything in sight. The rear-view camera provides you with a wide-angle view of the vehicle's rear.

The new ease of travel

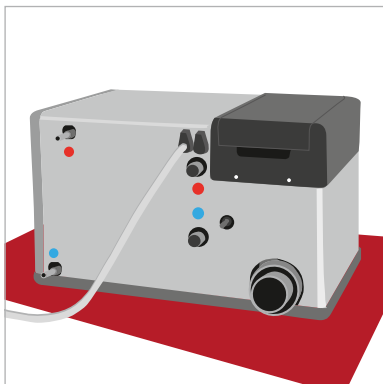

3.5 tons – this number has a magical meaning for us.

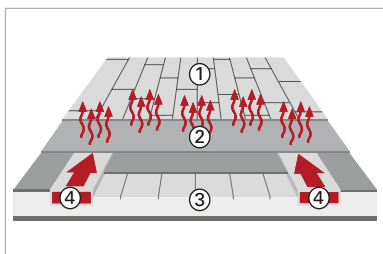

First we dreamt about it, then we invested a lot of work and ideas, now we have it in black and white: As the first manufacturer we guarantee you maximum capacity for vehicle load for each of our vehicles with less than 3.5 tons total weight. Why? Well, it is obvious – less weight, more advantages for you. Think about special driving licence, higher road charges and access restrictions. And now forget about all of this, then with an LMC motorcaravan you can easily enjoy your holidays. Guaranteed!

Finally winter

 3. Hot air circulation

DuoControl with crash sensor and Eis-ex (option)

Multifunctional double floor (according to model)

Thought-out rear ventilation concept

The world does not only turn around the sun in winter, but also around your motorcaravan.

Do you know how relaxing it is to sit comfortably in the settee arrangement and simply watch ice crystals falling? "Beyond words" we say and recommend to every winter fan: Wait until the temperatures fall, then take the motorcaravan and start to see the most beautiful snowflakes and ice crystals in this world. We deliver well thought-out insulation systems, bespoke heating and ventilation systems and extra storage space so that there is also sufficient space for winter equipment. Add spontaneity and curiosity, then start your winter fun.
