The New Conqueror

Synonymous with impressive style, this top range enjoys an enviable combination of comfort, practicality and design innovation.

Exterior styling and interior refinement that have taken touring to a new dimension encompass this six model range which offers a new fixed twin bed layout amongst its range of single and twin axle models.

The sleek profile features a front sunroof which curves with the roof line. With AL-KO ATC stability control system added as standard to the shock absorbers and Hankook tyres, these models are some of the most aerodynamic and safest to tow.

Touring is about freedom and relaxation and Swift designers have worked hard to ensure the Conqueror can provide just that.

'Mali Acacia' woodgrain offers richer colouring with a defined woodgrain texture and the contour of the front panel allows for maximum headroom and roof-locker space throughout.

The panoramic front sunroof gives a great view out and comfort is assured with the padded corner backrests and large scatter cushions.

Alde radiator central heating and water heating with daily programming >>

Chest of drawers design makes it easy to create a small table without disturbing items on top >>

Positive locker catches for secure storage on the move

'Impala' upholstery option

A choice of flexible seating and sleeping arrangements combine with well equipped kitchens and washrooms.

- 'Impala' stain-resistant, easy-clean seating fabric with soft nubuck texture

Dealer-Fit Options

- Wrap-around seating in addition to drawer chest
- Dometic B2200 roof-mounted air conditioner (twin-axle models only)

AWNING SIZES: Due to the varying awning designs and sizes the awning sizes given are approximate only. Specific awning sizes must be confirmed by your dealer or the awning manufacturer prior to purchase.

Bed Sizes: Please note that the front double bed sizes quoted are for seating configurations without chest of drawers. The front double bed width for a layout with a chest of drawers fitted will be reduced by 0.4m(1'4") from that stated.

Weights: The method of calculating the Mass in Running Order (MRO) and user payload figures has changed in order to bring it in line with European Vehicle Directives.

Allowances for essential equipment (e.g. gas cylinders) previously allowed for in the user payload are now contained within the MFO. A provision for a leisure battery which used to be within the essential equipment payload has now been included within the personal effects payload allowance. Although the method of calculation has changed, the overall effect is that the amount of payload available to the customer has remained the same, it is just calculated in a different manner.
