AUTO TRAIL

Lo-Line Skyline

Hi-Line Skyline

NEW for 2013

Good news for purchasers of the 2013 Auto-Trail range. Our new full-length Skyline panoramic rooflight features in all three of our overcab profiles. No, not a misprint - but the result of some really switched-on thinking by the design department.

They've produced three beautifully-sculpted new shapes for our industry-leading choice of overcabs and all will be equipped with the Skyline as standard. At the trade preview, dealers and journalists were bowled over by the sense of space and ambience the new designs provided.

There's more… another new Tracker layout which we are really excited about. Tracker has always been a pace-setter, last year the RS and FB hit the ground running and in response to customer demand for fixed-bed designs in a manageable length and with Tracker's stylish design signatures, we are offering the RB with a superb island double-bed located transversely at the rear. As always, Auto-Trail is unique in offering optional lounge layouts thus ensuring that Tracker ticks all the boxes.

Finally, we've consolidated all our previous upgrades and added even more to the Apache and Frontier ranges. Too many to list in this introduction, but suffice to say that there isn't anything inside or out that we haven't examined, evaluated and looked at how it can be improved – but without sacrificing payload or increasing the windscreen price. We think you'll be impressed but don't take our word for it, read on and make your own mind up!
