

# CABBY

2011

**Living in a caravan is something to look forward to.** That's the case with Cabby, a safe choice when it comes to choosing a caravan. Thanks to our 45 years in the industry, we can offer a year-round caravan with a functional design and the best indoor climate on the market.

**Every Cabby is adapted for the Nordic climate** and equally pleasant to live in all year round, regardless of whether it's the summer or the depths of winter. What you get is unbeatable insulation, warm water underfloor heating and well-adapted air gaps. A practical kitchenette, shower and toilet, comfortable sitting area and plenty of storage space.

**With Cabby there's a caravan to suit every need.** With 2011 approaching, we are also launching two new caravan models and Caienna – a new, fullyfitted, exclusive series that takes the caravan experience to an even higher level. Caienna is available in almost all our models.

**We have an exciting caravan year ahead of us** and with this catalogue you can discover our latest innovations, compare all our caravan models and immerse yourself in the interesting solutions that make your choice easier. Have a good read and enjoy your caravanning holidays!

**Hans Lindh, MD Cabby**

## Our new features

**Above:** Aluminium skirts with integrated side marker lights.

**Right:** Caienna – our new exclusive series. A caravan packed with virtually everything you need for a comfortable caravanning holiday.

For model year 2011, Cabby is launching several new features. Discover Caienna, the exclusive new series that gives you that little bit extra without you having to make any compromises. We are also launching two completely new caravan models with exciting solutions and practical details: F4 Double, available in three sizes, and FTM Flexi with a larger sitting area in the middle of the caravan.

**Left:** Caienna spice rack in black laminate with rails

**Above:** This year's new fabric, Karin

### **Caienna – our new exclusive series**

Caienna is the clear choice for those of you unwilling to make any compromises. A fully-fitted series, it gives you that little bit extra and a caravan bursting with clever design details. Caienna is available in almost all Cabby models and you decide yourself which fabrics you want in your caravan. Read more about Caienna under Optional extras on pages 56–57.

### **FTM Flexi offers new possibilities**

FTM Flexi is a modifiable caravan with a plethora of smart refinements. There are two comfortable, good-sized sitting areas, of which the smaller one can easily be made up into extra beds. You can also replace it with practical bunk beds. The caravan has a large kitchenette and a spacious bathroom with shower and toilet. Read more on page 31.

### **F4 Double – perfect for holidays**

F4 Double is a superb caravan for those who want to live comfortably during their holidays. It features a practical kitchenette with corner unit, a good-sized double bed, a comfortable sitting area and plenty of adaptable storage space. F4 Double is available in three sizes. Read more on page 24.

### **Modern design with new Karin fabric**

New on the textile front, Karin features a modern design in dark grey, shiny fabric with black patterning. A practical and durable fabric that is suitable for all our caravans.

## More new features

New handle on wardrobe doors

Dampers on overhead cupboards

Drying cupboard with fan and protective cover

Lighting in ski compartment

Underfloor heating with shunt

New bathroom cupboard in FT, LT and FTM

Arrow icons turn cover

Drawer storage system under bunk bed in F2C 620+ and 650+

New switchblade key for outer door and hatches

Wooden edge on table, front sofa and dinettes

TV unit/step-in wardrobe now with wider doors and LED-illuminated plexiglas wine-rack

# The Cabby method offers unbeatable comfort

Holidays in a caravan should be comfortable. With a Cabby, you get the most comfortable indoor climate the market has to offer all year round and this is mainly due to the Cabby method, well-proven technology used in the construction of all our caravans.

## **Maximum comfort all year round**

The secret behind the Cabby method is the extremely well-insulating polyurethane material that creates a minimum of seams in the walls and ceiling. The highly-insulating polyurethane foam is injected between the outer and inner walls, in the floor and ceiling to fill the

void. It forms a sandwich structure that becomes extremely strong and stable, keeping the cold out in the winter and the heat out in the summer. Read more about the Cabby method on pages 46–47.

## **Effective heating system**

The Cabby method offers by far the

best insulation on the market and all our caravans also feature an unbeatable heating system that helps create greater comfort. Each caravan includes warm water central heating, three heating coils in the floor and air gaps along the walls to create an even and well-ventilated indoor climate.

# Cabby Safety System for your safety

All our safety features are collectively named the Cabby Safety System. The way in which these safety features are constructed is not visible from outside the caravan but they are obviously important from the point of view of security and the total experience of living in the caravan.

## **Safety on the road**

With a Cabby you get an easy-to-tow caravan with track stability. This is largely thanks to our scrupulous safety work. All our caravans have an extremely well-balanced chassis that is specially produced for Cabby and gives the body

the correct degree of stability. What you get is a unique suspension system that can cope with all types of road surface and nitrogen-filled tyres that minimise the risk of corrosion. The ATC prevents the caravan from snaking and the AKS stabiliser hitch has a stabilising effect.

## **Extra strong and stable**

The Cabby method, in combination with the so-called Power Lock technology which locks the transitional sections between ceiling, front and wall without creating thermal bridges, makes the caravan extremely strong and stable.

Read more on pages 43–45.

# No one wants to be cold in winter – with a Cabby, it's not a problem

To really enjoy the snow and chill of a winter holiday, it's a pleasure to come back to a proper winter caravan. A caravan in which you can relax completely, is suitably equipped and keeps the heat in when the thermometer outside shows temperatures below zero. With a Cabby you get a fantastic all-year-round caravan.

- ✓ Well-insulated caravan that is also energy-efficient
- ✓ Warm water central-heating with three output settings
- ✓ Three underfloor heating coils for the best possible heat distribution
- ✓ Well-adapted air gaps that help create even, comfortable warmth
- ✓ Heated shoe compartment
- ✓ Heated drainage system

#### More comfortable indoor climate

Cabby is designed for a harsh winter climate. What you get is a caravan with a comfortable temperature inside, when the cold makes itself felt outside. This is mainly due to the extremely well-insulating material, polyurethane, used in the construction of all our caravans to create a more comfortable indoor climate all year round. Read more about the Cabby method on pages 46–47.

#### Comfortable flooring in your caravan

Every Cabby features several good-sized air gaps to help create an even, well-ventilated heat. Our warm water underfloor heating system with three heating coils ensures a pleasant feeling of warmth when you put your feet down on the floor of your caravan. A heated drainage system is fitted as standard to all our caravans.

#### Warm, dry shoes and clothing

With a Cabby, you get a drying cupboard with fan and heated shoe compartment so that you always have dry, warm shoes and clothes to put on before making your way out into the winter cold. To help keep your ski equipment in order when darkness falls, a ski hatch with interior lighting is included in every caravan.

# Choosing the layout

There are plenty of things to take into consideration when it comes to choosing a caravan. One of the most important questions to come up is which caravan layout will suit your needs best? Do you want a caravan with single beds or a double bed, a family caravan with several beds or do you need a layout that will allow you to add extra sleeping spaces?

To make it easier for you to find the right one, we have divided our caravans into four categories: *Single*, *Double*, *Flexi* and *Family*.

## SINGLE

For those who prefer to sleep in separate beds. Single is available in sizes 620 – 800.

## FLEXI

The smaller sitting area can easily be converted to create two extra beds. Flexi is available in sizes 620 – 800.

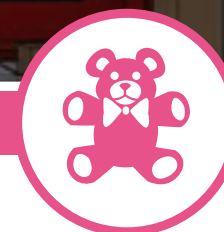

## DOUBLE

When you want to sleep in an ordinary double bed. Double is available in sizes 570 – 800.

## FAMILY

Family caravan with bunk beds for the children. Some of our caravans also have a separate children's compartment. Family is available in sizes 620 – 800.

# Single – for a comfortable holiday

*Single* is perfect for those who prefer the comfort of sleeping in their own bed. The caravan is well planned with plenty of space for everyone to enjoy themselves.

## L Single

*L Single* is a caravan for those who prioritise spacious comfort and sleeping in their own bed. The practical kitchenette, toilet and wardrobe are located in the middle of the caravan. Sit in comfort at the front of the caravan in the pleasant sitting area that is simple to convert into sleeping spaces in the evening.

**CABBY 620+L**

A-dimension	1,020 cm	Internal length	555 cm
Total length body	625 cm	Internal width	234 cm
Total length	751 cm	Weight	1,450–1,800 kg

**CABBY 650+L**

A-dimension	1,050 cm	Internal length	585 cm
Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Weight	1,500–1,800 kg

### LT Single

*LT Single* is a caravan for those who appreciate smart solutions. Step into the caravan and you will be met by an attractive kitchen area. The bedroom has two adjustable single beds and, between the beds, the entrance to a large bathroom with shower cubicle.

CABBY 700+LT

A-dimension	1,100 cm	Internal length	630 cm
Total length body	700 cm	Internal width	234 cm
Total length	841 cm	Weight	1,700–1,800 kg

CABBY 740+LT

A-dimension	1,135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Weight	1,900–2,400 kg

CABBY 800+LT

A-dimension	1,195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Weight	2,000–2,400 kg

# Double – for maximum comfort

*Double* is a caravan featuring maximum comfort and a cosy layout. It is fitted with a good-sized double bed and has well thought-out storage space.

## F3 Double

*F3 Double* is one of our most popular models. The ample double bed is fitted at the rear of the caravan while, in the front compartment, the sitting area can easily be converted to create extra sleeping places. The well-equipped kitchen area completes the caravan.

**CABBY 570+F3**

A-dimension	980 cm	Internal length	510 cm
Total length body	580 cm	Internal width	234 cm
Total length	704 cm	Weight	1,390-1,800 kg

**CABBY 620+F3**

Total length body	625 cm	Internal width	234 cm
Total length	751 cm	Weight	1,500-1,800 kg

**CABBY 650+F3**

A-dimension	1,050 cm	Internal length	585 cm
Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Weight	1,600-1,800 kg

New  
feature!

## F4 Double

*F4 Double* is a completely new model available in three sizes. The caravan is fitted with a practical kitchenette with corner unit, a comfortable sitting area and a cosy sleeping compartment with double bed.

### CABBY 570+F4

A-dimension	980 cm	Internal length	510 cm
Total length body	580 cm	Internal width	234 cm
Total length	704 cm	Weight	1,390-1,800 kg

### CABBY 620+F4

A-dimension	1,020 cm	Internal length	555 cm
Total length body	625 cm	Internal width	234 cm
Total length	751 cm	Weight	1,500-1,800 kg

### CABBY 650+F4

A-dimension	1,050 cm	Internal length	585 cm
Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Weight	1,600-1,800 kg

## FT Double

*FT Double* is the perfect caravan for those unprepared to compromise on comfort or quality. The caravan is fitted with a generous-sized double bed and smart storage. The shower and toilet are at the rear of the caravan.

**CABBY 650+FT**

A-dimension	1,050 cm	Internal length	585 cm
Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Weight	1,600-1,800 kg

**CABBY 700+FT**

A-dimension	1,100 cm	Internal length	630 cm
Total length body	700 cm	Internal width	234 cm
Total length	841 cm	Weight	1,700-1,800 kg

**CABBY 740+FT**

A-dimension	1,135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Weight	1,900-2,400 kg

**CABBY 800+FT**

A-dimension	1,195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Weight	2,000-2,400 kg

## FM Double

With *FM Double* you get a caravan with a practical layout. The bedroom is screened off from the rest of the interior and has a good-sized double bed. Equipped with everything you need, the kitchen area is in the middle of the caravan and the U-shaped sitting area can easily be converted to create extra beds.

### CABBY 740+FM

A-dimension	1,135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Weight	1,900-2,400 kg

# Flexi – offers more options

With *Flexi* you decide yourself how you want it to be. The layout offers you the option of more sleeping places as the smaller sitting area can easily be made up into extra beds.

## M Flexi

With *M Flexi* you get a wonderful caravan with a multi-purpose layout. The sitting area at the front of the caravan functions as a dining area during the day and sleeping area at night. The caravan's smaller sitting area can easily be converted to create extra beds at night.

**CABBY 700+M**

A-dimension	1,100 cm	Internal length	630 cm
Total length body	700 cm	Internal width	234 cm
Total length	841 cm	Weight	1,700-1,800 kg

**CABBY 740+M**

A-dimension	1,135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Weight	1,900-2,400 kg

## F2B Flexi

*F2B Flexi* is a flexible caravan with a practical kitchenette and plenty of space for everyone to enjoy themselves. If you have guests or grandchildren to stay, you can quickly and easily convert the caravan's small sitting group to create extra sleeping places.

**CABBY 620+F2B**

A-dimension	1,020 cm	Internal length	555 cm
Total length body	625 cm	Internal width	234 cm
Total length	751 cm	Weight	1,450-1,800 kg

**CABBY 650+F2B**

A-dimension	1,050 cm	Internal length	585 cm
Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Weight	1,500-1,800 kg

New  
feature!

## FTM Flexi

*FTM Flexi* is a new model with several smart solutions. The smaller sitting area in the middle of the caravan can easily be converted to create extra beds. You can also replace it with bunk beds. The caravan has a large kitchenette and a spacious bathroom with shower and toilet.

### CABBY 800+FTM

A-dimension	1,195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Weight	2,000-2,400 kg

# Family – perfect for the family

*Family* is the perfect solution for both large and small families. Fitted with a bunk bed and double bed as standard, some models even have a separate children's compartment.

## M2C Family

With *M2C Family* you get a caravan with plenty of space and smart storage solutions. The caravan is fitted with a double bed and bunk bed. It features an attractive kitchen area and a comfortable sitting area. The layout even includes substantial storage space that you can access from the inside as well as outside of the caravan.

**CABBY 700+M2C**

A-dimension	1,100 cm	Internal length	630 cm
Total length body	700 cm	Internal width	234 cm
Total length	841 cm	Weight	1,700-1,800 kg

**CABBY 740+M2C**

A-dimension	1,135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Weight	1,900-2,400 kg

## F3F Family

*F3F Family* is a caravan with plenty of space for the large family. It has a practical, pleasant kitchen, a spacious sitting area, a smaller sitting area that can be converted into a bed, a bunk bed and, at the rear of the caravan, a double bed and toilet.

CABBY 800+F3F

A-dimension	1,195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Weight	2,000-2,400 kg

## F2C Family

*F2C Family* is perfect for the family with small children. The bedroom is fitted with a double bed and bunk bed. Toys, games and clothes can be kept in the smart storage spaces and there is plenty of room at the front of the caravan for enjoyable meals together.

**CABBY 620+F2C**

A-dimension	1,020 cm	Internal length	555 cm
Total length body	625 cm	Internal width	234 cm
Total length	751 cm	Weight	1,450-1,800 kg

**CABBY 650+F2C**

A-dimension	1,050 cm	Internal length	585 cm
Total length body	655 cm	Internal width	234 cm
Total length	796 cm	Weight	1,500-1,800 kg

**CABBY 700+F2C**

A-dimension	1,100 cm	Internal length	630 cm
Total length body	700 cm	Internal width	234 cm
Total length	841 cm	Weight	1,700-1,800 kg

**CABBY 740+F2C**

A-dimension	1,135 cm	Internal length	670 cm
Total length body	740 cm	Internal width	234 cm
Total length	872 cm	Weight	1,900-2,400 kg

**CABBY 800+F2C**

A-dimension	1,195 cm	Internal length	740 cm
Total length body	810 cm	Internal width	234 cm
Total length	942 cm	Weight	2,000-2,400 kg

# Fabrics for your caravan

Put your own personal stamp on your caravan. When you invest in a Cabby, you always have a large selection of fabrics and leather upholstery to choose from. The fabrics are woven in hardwearing and easy-to-maintain materials, specially produced for Cabby's furniture. Choose the most suitable materials, colours and patterns for your caravan.

# Technical details that are out of sight but add to your enjoyment

Here, at Cabby, we put a great deal of time and effort into the equipment and practical details but that is only a small part of what goes into our caravans. We also put a huge amount of work into developing what cannot be seen in a Cabby. What we are talking about here are the materials that go into the walls and under the floor – smart solutions that add to the comfort and enjoyment of your caravan.

On the following pages, we will guide you through the range of features that make Cabby caravans particularly special and give you the right tools to help make as sound an investment as possible.

# Cabby Safety System

The Cabby Safety System is the generic name for all our safety systems. They include a number of unique features that together offer the safest caravan by far to tow behind your car.

## AL-KO chassis

### – the most stable on the market.

Towing a Cabby behind your car will give you nothing but pleasure. Whether your journey take you long distances on dead straight motorways or on narrow, winding roads in the depths of the countryside. The secret is Cabby's well-balanced chassis from AL-KO combined with the highly rigid body.

The chassis is the caravan's support base and has a direct bearing on its driving characteristics and the strength of the body, as well as long-term watertightness. A correctly designed chassis

ensures good towing characteristics and does not expose the driver to any unpleasant surprises. It also gives the body the correct degree of steadiness, actively contributing to maximising driving stability.

## Brackets

Cabby's chassis, with extra long traction spars, is equipped with four supporting brackets along the sides. These support the weight of the sides and minimise the risk of the floor becoming bowed.

The brackets concentrate the

strength of the body, giving the caravan horizontal stability and minimising stresses imposed on the floor and interior fittings.

## Axle and wheel attachment

The fact that the chassis is horizontally stable is an important factor in locating the axle and the tracking of the wheels. A stable axle and wheel attachment is an important contributory factor for track stability which, in the final analysis, minimises tyre wear, too. The function of the cross beams is to provide support for the longitudinal side beams in order

**For many years, Cabby** has been engaged in continuous development work to produce roadworthy chassis designs. This research has led to all Cabby's models being based on a design that gives the floor and body the full support of the chassis.

to avoid distortion and to stabilise the axle beams and axle.

### Aisle beam

Cabby's chassis lies directly under the floor and supports it along the full length – and width – of the caravan. There is a supporting aisle beam underneath the caravan's aisle that ensures the floor will not start sagging after a few years. A stable floor is of crucial importance, bearing in mind the warm water heating system embedded in the floor.

### Corner steadies

Cabby's corner steadies are secured to the chassis' longitudinal beams. This increases the stability of the caravan when parked and minimises the risk of developing a soft and wobbly floor, a common problem with older caravans.

---

It's great to get away, of course, but you have to be confident about getting back, too. The Cabby Safety System is the generic name for all our safety systems.

---

### Delta axle

The dimensions are allocated with millimetre precision in the chassis and axle for each caravan model, depending among other things on its weight and length. The suspension is optimised to cope with all types of road surface and changes in direction. Thanks to the precise suspension tracking of the Delta axle, you can rely on your Cabby to be stable on any road surface without giving you any nasty surprises.

### ATC – AL-KO Trailer Control

The ATC anti-snaking system has been a standard specification for many years on caravans from Cabby. ATC manages to automatically correct the oscillating motions (snaking) that can occur at so-called critical speed which varies depending on factors including the car, the load, the nature of the road, the caravan and

! Thanks to ATC, you can feel safe behind the wheel, on poor roads as well as when oncoming traffic gets too close or you have to take sudden evasive action.

! The corner steadies are secured to the chassis' longitudinal beams. This provides additional stability.

weather conditions.

### How the ATC anti-skid system works

Well-judged braking stretches out the unit and the snaking is corrected, gently and smoothly before you have even noticed it is happening. ATC is a compact unit with sensors, control electronics and a traversing motor connected to the caravan's brake system. A correctly installed thirteen-pole socket on the towing vehicle is required for the unit to function. With an ordinary socket the caravan functions as normal but without ATC.

The sensors continually monitor the caravan's lateral movement and send continuous signals to the control unit that determines whether it has to do anything to maximise driving stability. The control unit can trace oscillating tendencies at an early stage as well as distinguish them from other lateral movements such as long bends and tricky road conditions. It can also sense whether the snaking will abate on its own or not. In the latter case, the caravan's service brake is activated by means of the traversing motor and the unit is gently braked.

### AKS stabiliser hitch

The AKS stabiliser hitch provides a stabilising effect. It does this by means of a friction lining that presses against the car's tow ball. In situations where you are being overtaken by large vehicles, the hitch reduces the lateral forces that arise from the slipstream of the overtaking vehicle. Together with other units in the Cabby Safety System, the AKS stabiliser hitch offers superior roadworthiness.

### Tyres and rims

To ensure maximum road-holding and safety, all Cabby caravans are fitted with 15" aluminium rims (14" on caravans with tandem axles). They are also filled with nitrogen instead of air in order to extend the service life of the tyres. Nitrogen prevents the ingress of moisture into the tyres, thus reducing the risk of corrosion, and the pressure remains constant over time without being affected by the temperature. A feature that benefits safety, fuel consumption and, not least, the environment.

### Safest on the road

A clear indication of the integrity of our safety systems lies in Husvagn &

Camping's caravan test in which Cabby was awarded the most points in the "On the road" category. The secret lies in the ATC anti-snaking system which is fitted as standard to all our caravans. See the double test in Husvagn & Camping, May 2009.

### Cabby Safety System

- ✓ Stiff and well-balanced chassis for maximum roadworthiness
- ✓ Delta axle that helps create a lower centre of gravity
- ✓ Optimised suspension to cope with all types of road surface
- ✓ Globally unique ATC antisnaking system
- ✓ AKS stabiliser hitch provides stabilising effect
- ✓ Nitrogen-filled tyres

The AKS stabiliser hitch provides a stabilising effect by means of a friction lining that presses against the car's tow ball.

# The Cabby method

One of the biggest reasons for choosing a Cabby is the supreme comfort offered by each of our caravans. The chief reason for our comfortable indoor climate is the Cabby method which offers by far the best insulation on the market.

The Cabby method includes well-proven technology used in the construction of all our caravans and is based on an extremely highly-insulating material (polyurethane) which creates a minimum of seams in the walls and ceiling. This construction keeps the cold out in the winter and the heat out in the summer. It also helps give the caravan increased stability and road-holding capability.

## How the Cabby method works

The sides, floor and roof of the caravan are constructed in complete units. We inject

highly-insulating polyurethane material between the outer and inner walls, in the roof and the floor. The polyurethane expands and hardens in every nook and cranny of the unit. A stable sandwich structure is formed, with plywood on the inside and strong panels on the outside. The construction is immensely strong with very few wooden joists, thus minimizing the risk of thermal bridges.

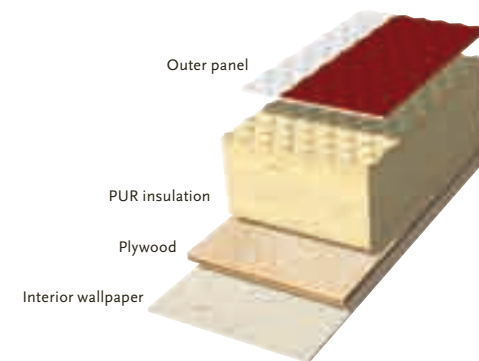

## Polyurethane

Polyurethane consists of insulating, microscopic gas bubbles with a closed

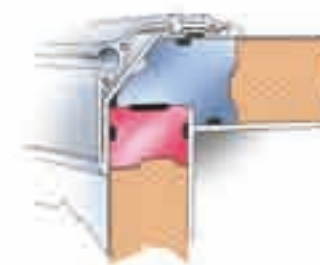

cell structure. These are resistant to moisture, an important property due to the fact that as little as one per cent of moisture in the material will reduce insulating capacity by 25 per cent. Damp insulation is also, of course, a breeding ground for micro-organisms and mould.

## Durability

The insulation we use is proven to have good ageing properties. Polyurethane insulation retains its essential qualities for significantly more than 100 years

**Cabby's insulation method is superior** to any other on the market. As a Cabby owner, you will have a modern, stable caravan with a high trade-in value, a year-round caravan that can deal with the cold of winter as well as the heat of summer better than any other on the market.

**The unique qualities of the Cabby method** combined with our polyurethane profile – Power Lock – which locks the transitional sections between roof, front and wall without creating thermal bridges, makes the caravan extremely strong and steady. The result is a self-supporting structure and the stiffest body on the market by far.

and the technology is increasingly gaining ground as an effective insulation material, especially in the building industry where energy issues have come to the fore. The superior insulating qualities of polyurethane are becoming increasingly in demand.

### Thermal conductivity

The type of polyurethane foam (PUR) used in Cabby caravans has thermal conductivity of  $0.024 \text{ W/m}^\circ \text{K}$  while insulation of the Ecoprim type has  $0.030 \text{ W/m}^\circ \text{K}$ . This means that Cabby's PUR insulation has a 25 per cent better insulating capacity (K value) than Ecoprim insulation.

### A small comparison

Cabby has 32 mm PUR insulation in the walls and roof, and 36 mm PUR insulation in the floor. To highlight the difference, comparisons can be made with other materials used to insulate caravans and buildings. The conclusion is obvious – even though other caravan manufacturers use thicker insulation than Cabby, they do not have sufficient-

ly thick insulation to approach Cabby's insulating qualities.

### Cabby's heating system

All our caravans are equipped with warm water central heating and three heating coils in the floor. The heating system creates a pleasanter indoor climate, heats the drainage outlet and reduces the risk of the water freezing. The heat even reaches spaces where you keep items such as shoes and ski boots.

### Controls

There are air gaps behind the sofas, beds, overhead cupboards and kitchen units to ensure the heat in your caravan is as evenly distributed and ventilated as possible. The whole of the heating system is easy to regulate using the control panel strategically placed in the kitchen area. At the heart of the heating system is an Alde Compact central heating boiler  $3/5 \text{ kW}$  (electric/Calor gas). The boiler has three output settings and operates with both 230 V and Calor gas.

### Heat transfer

The Cabby method also benefits from the insulating effect provided by the heating pipes in the floor being pressed against the plywood floor with great force, guaranteeing good heat transfer. The superior insulation also ensures the heat does not find its way down to the underside of the floor, but gives maximum benefit to the interior. The underfloor heating system is also equipped with individual shut-off valves.

### Capacity

Cabby's superior insulation also contributes to extending the range for the outside temperature with which the caravan can cope using a 10 Amp fuse. Very few campsites currently offer 16 Amps, which is required in order to utilise the full 3 Kw capacity of the boiler.

**The coils in the underfloor heating** are particularly effective as the heating plates in the floor distribute the heat evenly.

### Cabby Comfort Concept

- ✓ Unbeatable insulating qualities throughout the caravan
- ✓ Warm water central-heating with three output settings
- ✓ Three heating coils for even and comfortable heat distribution
- ✓ Good-sized air gaps that help create even, well-ventilated warmth
- ✓ Step-in wardrobe and heated shoe compartment
- ✓ Heated drainage system

# Standard equipment that is always included

Cabby maintains high standards from the outset without it costing you any extra. What you get is a caravan with exciting features and interesting solutions that others call extra equipment. You can see below what is included when you invest in a caravan from Cabby.

## Guarantee

- 5 year water-ingress guarantee
- 2 year overall guarantee (see guarantee book)

## Cabby Safety System

- ATC anti-snaking system
- AL-KO chassis
- AKS stabiliser
- Delta axle with rubber torsion
- AL-KO tow bar cover
- Rear light
- High positioned brake light
- Gas leak tester
- External heating connection
- Earth fault circuit breaker

## Cabby Comfort Concept

- Warm water underfloor heating with three heating coils
- Alde Compact boiler 3/5 kW (electric/Calor gas)
- Radiators with heat exchanger
- Heating coils in shoe compartment
- Hot water
- The market's best insulation with high-efficiency polyurethane

- Drying cupboard
- Internal waste-water tank 25 l

## Cooking enjoyment

- Kitchen units with soft-close drawers
- Dampers on overhead cupboards
- Cooker hood extractor fan with two settings
- Three-burner cooker
- Ceramic mixer tap in kitchenette
- 45 litre water tank with exterior refilling
- Dometic refrigerator 189/122

## More comfortable sleep

- Anatomic viscoelastic mattresses: Bultex 8 cm and Sensus 6 cm
- Adjustable head end, divisible on double bed

## Bathroom/toilet

- Revolving cassette toilet with flushing
- Ceramic mixer tap in toilet

## Media

- Awning fittings incl. connection

for cable TV

- Speakers in sitting area
- Pre-installed audio and video cable for DVD

## Miscellaneous

- 15" aluminium rims (14" on caravans with tandem axles)
- One-key system
- Awning lighting
- Awning rails in aluminium strips
- Indoor/outdoor temperature gauge
- Transparent skylight 60x60 cm
- Lighting in underbed storage compartment
- Tinted openable windows (entrance door window not openable)
- Cassette blinds with mosquito net
- Premium corner steadies on all caravans with tandem axles
- Lighting in Calor gas compartment
- Over-cupboard lighting
- External storage compartment (not 740+FM).
- Ski compartment with lighting

Adjustable head end

Underbed storage

Lighting in Calor gas compartment

Kitchen units with soft-close drawers

Shoe compartment with heating coils

Practical hooks

Caienna – a fully-fitted exclusive series

Overhead lighting in black laminate in kitchenette

Fridge freezer in brushed aluminium

Wave-shaped bedroom decor in matte acrylic with LED lighting

Plexiglas wine-rack and LED lighting

Black laminate top and cascade tap in bathroom

Ceiling light in brushed aluminium

# View us in detail

By choosing one of our caravans you are acquiring the market's best insulation, an AL-KO chassis with ATC anti-snaking system and three underfloor coils with warm water heating. You are also getting a plethora of smart solutions that make Cabby one of the most comfortable caravans available on the market.

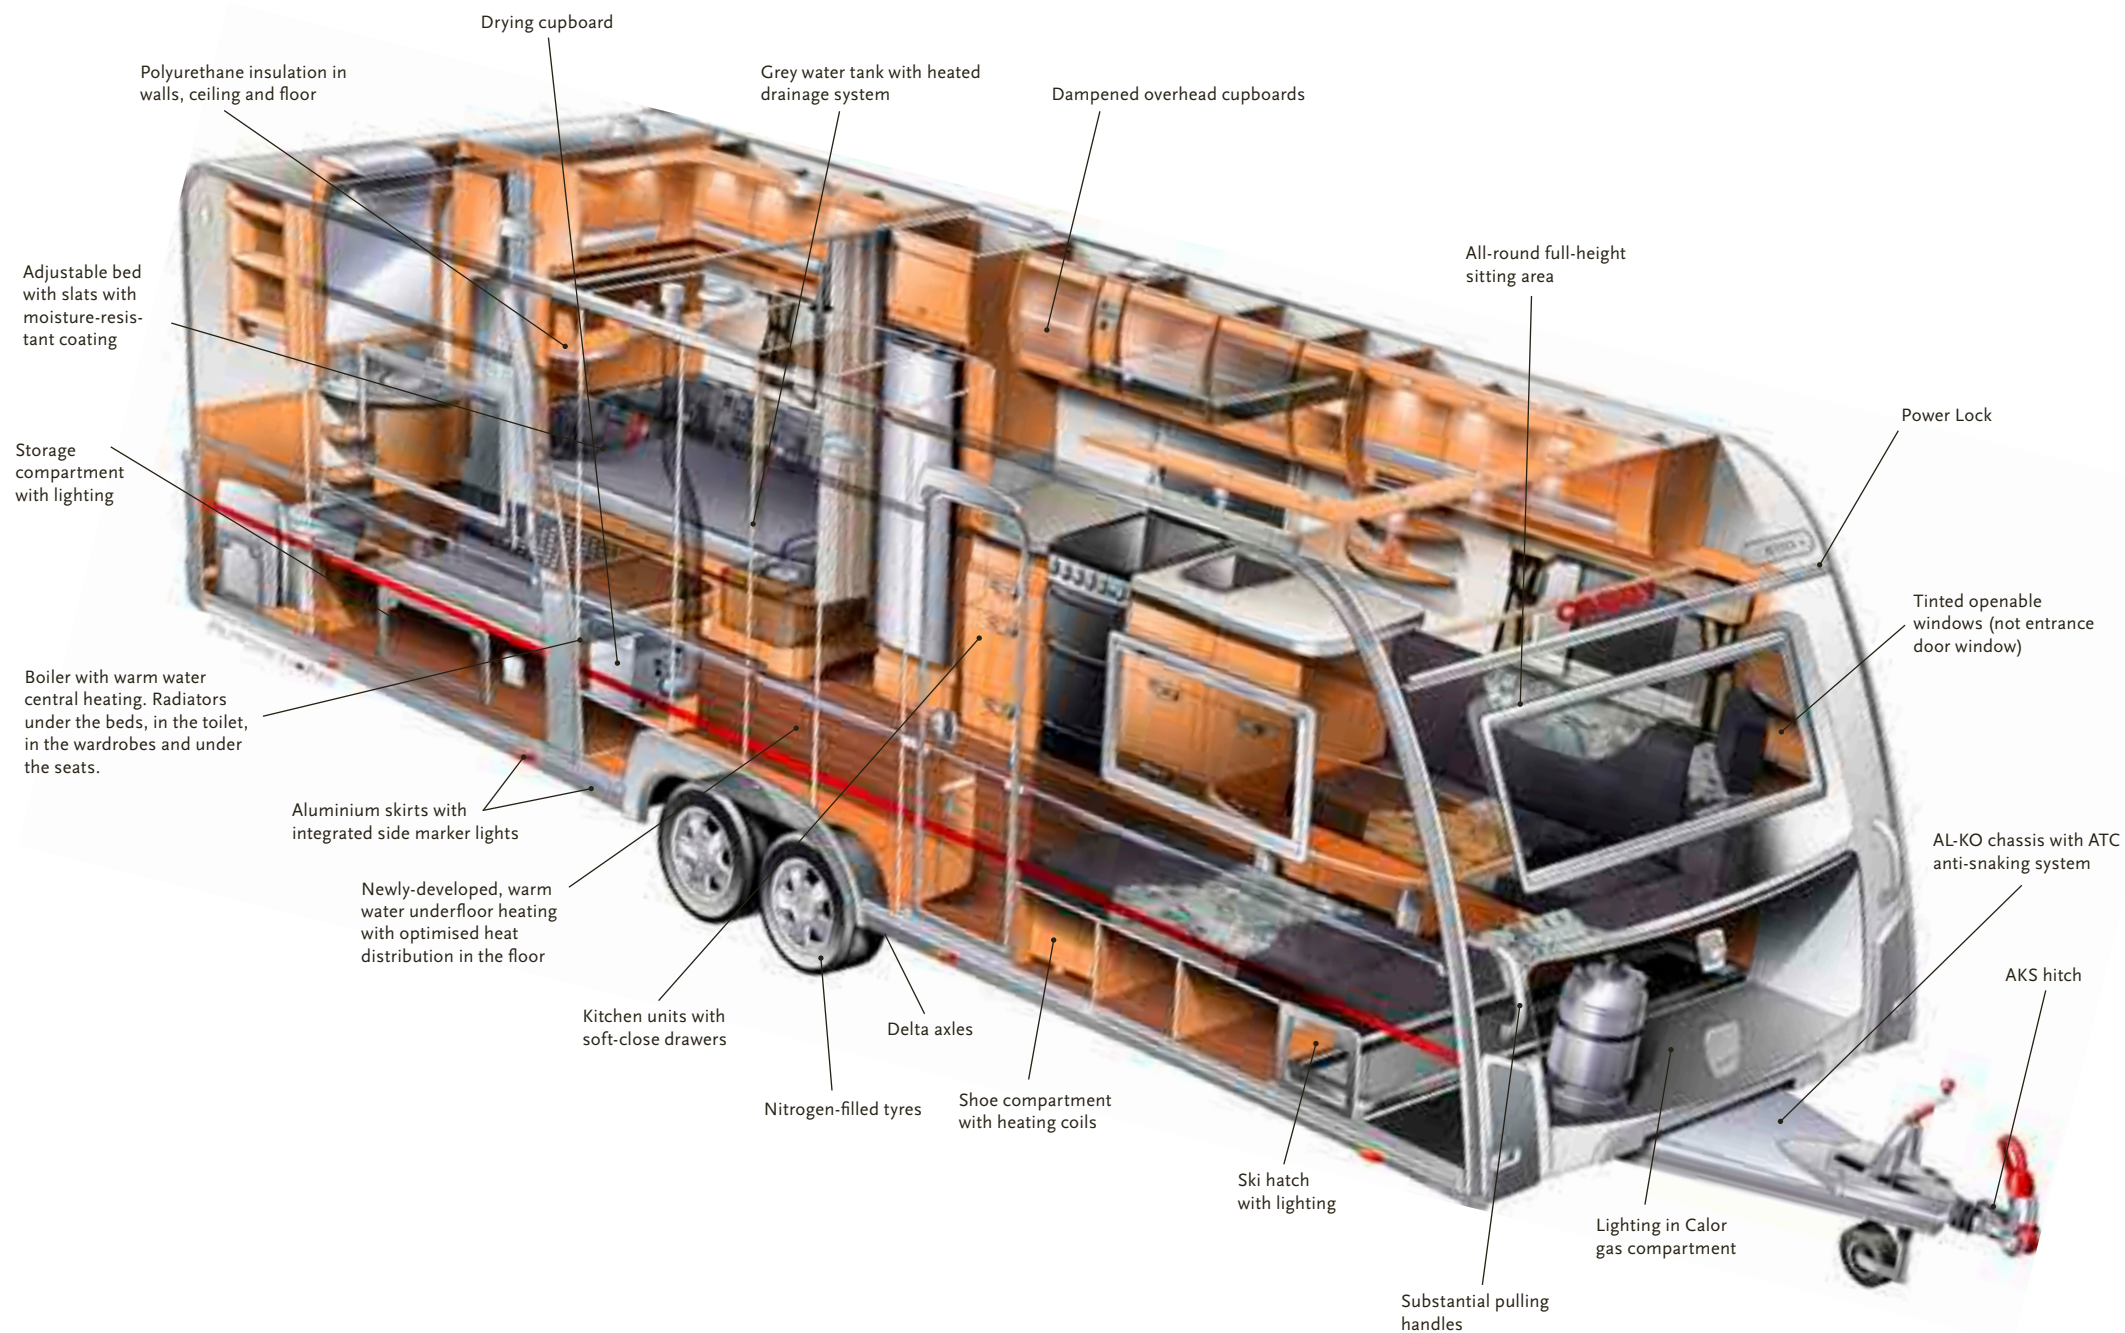

In a Cabby, you will sleep soundly at night in comfortable beds with adjustable head ends. The bathroom is practically furnished and has a toilet with electromagnetic flushing. Several of our caravans also have a shower cubicle. There is ample storage space

provided and kitchen units with soft-close drawers. The practical kitchen area is tastefully furnished with everything you need. We have also provided for you to sort your waste at source. Interior lighting includes ceiling lights, spot lights and bedroom lights and the already cosy

atmosphere in each caravan is further enhanced with the addition of carefully selected fabrics of the highest quality.

You will find many sound reasons for investing in a Cabby. Which is why we are more than happy for you to view us in detail.
